My opposition reasons to this proposal are:
1. Inadequate width of roads for the heavy truck activity. Currently the volume is very high. Many arteries are hilly, curvey with numerous blind spots. Truckers are traveling at high rates of speed and many roads DO NOT accommodate two trucks passing one another. 2. SAFETY OF RESIDENTS is high on my list. Personally I have been nearly struck twice by dump trucks. One near fatality occurred when I was on my bike enjoying our beautiful country setting. Driver failed to stop at a sign as I was in the right of way with no stop sign. My husband had a near head on collision with a skid steer sweeping gravel off Center Road. Operator was from the quarry Kevin Hahn. There was no warning signs posted that cleaning was taking place. Complete blind spot over a hill at entrance of Hahn quarry. Again another extreme situation of safety concerns. 3. Quality of resources (ie. water, runoff, added noise disturbances in addition to what currently is taking place, pollution and ugly aesthetics of a beautiful country side; historic cemetery parallels the proposed new quarry which is in my opinion a disgrace for those buried and their families). 4. Too many acres are already chewing up our countryside.

Section 10 of the Town's Comprehensive Plan discusses economic development and specifies "small, rural oriented businesses which provide services needed by the town". We do need gravel, but there are 9 other active gravel pits within 4 miles of the town center totalling at least 699 acres and there is no shortage of gravel. This new site will create a pit of 46 total acres creating hundreds of truck trips through a residential neighborhood, which can hardly be considered a small rural business. "Rural" is defined as "rustic, bucolic, pastoral" and a large industrial site does not fit this description. Goal 10 also requires local businesses to have access to a state or county highway. This pit cannot meet that requirement without failing Goal 2 in the Comp Plan, "Reduce the amount of non-local traffic passing through residential areas." There will be economic damage to the town as well - a larger pit at this location will make the nearby home sites worthless, and the tax rate for residential properties is at least four times higher than that paid by the quarry, losing revenue for the town as road repair costs go up.

Absolutely opposed!! The town of rutland has currently peak volumes of 5000 gravel trucks per week. Enough...No more. When the Haun gravel pit was bought in 2017 they knew that expansion would be absolutely opposed. The Town of rutland has unaimously rejected 5 other proposed gravel pits in the last 30 years to keep a rural environment. All current town officials are not affected by gravel trucks or gravel pits. Please stop this degradation of the town of rutland.

We oppose the expansion of the existing gravel pit because it does not align with many elements of the Rutland Comprehensive plan, For example, increase risk to the safety of bicyclists, pedestrians and local traffic on the rural township roads; diminished rural character of country living; and concern of the southern portion adjacent to the Graves cemetery which will cause future damage to the historic gravesites.
