Betsy,

The existing conditions of the basins appear to be substantially in compliance with the previously approved stormwater plan. I don't have any concerns at this time.

Thank you,

Jason Tuggle

Hi Jason,

The two storm water ponds were surveyed. Please see attached figure showing the recent survey and 2011 as-built survey information (with 2011 as-built translated to NAVD88). Let me know if you have any questions.

Thank you,

Betsy

Betsy,

My understating was that demonstrating compliance with the stormwater plan was a condition of Zoning approval. In order to demonstrate that the existing basins are in compliance with the approved stormwater plan you would need to recertify them.

Thanks,

Jason Tuggle

Hi Jason,

I haven't sent anything. My May 16th email clarified that the pond the client is pumping is not a storm water treatment pond and that the client is not doing anything to the storm water basins on the site. Can you confirm that he doesn't need to resurvey or otherwise provide additional info on the existing storm water ponds at the site given this?

Thanks,

Betsy

Hi Betsy,

I haven't received anything from you certifying that the existing stormwater basins are functional per the design. Did you send me something?

Thanks,

Jason Tuggle

Hi Jason,

Just wanted to circle back on this to confirm that we don't have to provide anything further at this point. Let me know if you want to discuss.

Thank you,
Betsy

Thank you for the follow-up, Jason. Jason Fuller is not planning to perform any work on the storm water ponds (Basin 1 and Basin 2). He is just planning to pump the accumulated water in the storage pond associated with the compost pad. No maintenance for that pond is planned, unless the inspection shows any need for repair. The documents you shared apply to the storm water basins. Let me know if you'd like me to set up a call to discuss this.

Thank you,
Betsy

Hi Betsy,

I received your voicemail. The stormwater basins, outlets and conveyances to the basins would have to be resurveyed following maintenance activities. The as-built certification section of our ECSM manual linked below detailed what we would be looking for.

Thanks,

Jason Tuggle

Hi Betsy,

The permit documents can be accessed [here](#). Our as-built plan requirements are spelled out in our manual [here](#). Let me know if you have any questions.

Thanks,
