Re: Wetland Investigation Results

Greetings:

I am an Assured Wetland Delineator under Wisconsin Department of Natural Resources guidelines.

I completed a wetland investigation of an area of land at the northwest intersection of Egge Rd. & N. Bird St. in the Town of Bristol on April 17th, 2017 (see map on following page).

My report presenting the wetland investigation methods, results and conclusions is not yet complete.

I identified one small ($< \frac{1}{4}$ acre) wetland in the southwest corner of the investigation area, centered on a roadside ditch. I did not identify wetlands anywhere else in the investigation area.

The wetland boundary marked in the field is the best estimate of the location of the boundary based on the available vegetation, hydrology and soil evidence on April 17th of 2017. Wetland boundaries can change over time with changes in vegetation, precipitation, or regional hydrology. The US Army Corps of Engineers and/or the Wisconsin Department of Natural Resources have authority to make the final decision regarding the wetland boundary. Personnel from these agencies may adjust the boundary upon field inspection.

Sincerely,
Taylor Conservation, LLC
