2024 RES-046

**AWARDING CONTRACT FOR AD HOC LOW VOLTAGE
DATA & PHONE CABLING SERVICES**

Dane County Information Management (DCIM) maintains a vast computer network supporting Dane County operations. When departments and divisions across Dane County add, change or relocate staff or occupy new departmental locations it often requires data cabling of fiber, coax or ethernet to be installed. DCIM utilizes vendor services for large-scale data cabling changes and emergency cabling repairs that could have a negative impact on Dane County operations in facilities owned or leased by Dane County.

Pursuant to this effort as done every five years, the county issued 2024-RFP-023 to identify qualified firms to provide parts and services for cabling services on and materials basis. This process resulted in the selection of Integral Building Systems Inc. as the preferred vendor.

Dane County has negotiated a contract with Integral Building Systems Inc. with an amount not to exceed \$750,000 to provide cabling services as needed at various county facilities over the next five years.

BE IT FINALLY RESOLVED THAT the County Executive and County Clerk are authorized to execute the contract documents.
