# Conditional Use Application

Application Fee: \$486 Mineral Extraction: \$1136

**Items required to be submitted with application:**

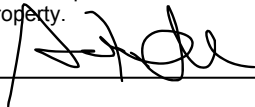

- Written Legal Description of Conditional Use Permit boundaries**
- Scaled drawing of the property showing existing/proposed buildings, setback requirements, driveway, parking area, outside storage areas, location/type of exterior lighting, any natural features, and proposed signs.**
- Scaled map showing neighboring area land uses and zoning districts**
- Written operations plan describing the items listed below (additional items needed for mineral extraction sites)**
- Written statement on how the proposal meets the 6 standards of a Conditional Use**

Owner	Town of Dunn	Agent	Hoyos Consulting LLC
Address	4156 Cty Rd B	Address	PO Box 368

Parcel numbers affected: 0610-212-9800-0 Town: Town of Dunn Section: 21  
 Property Address: 4156 Cty Rd B, McFarland, WI

Existing/ Proposed Zoning District : RH1

- Type of Activity proposed:**  
Construct a 60' communications tower for purposes of providing broadband internet services, as funded by WI Public Service Commission Grant
- Hours of Operation**      unstaffed location
- Number of employees**      n/a
- Anticipated customers**      n/a
- Outside storage**      none
- Outdoor activities**      none
- Outdoor lighting**      none, tower not required to have lighting
- Outside loudspeakers**      none
- Proposed signs**      none
- Trash removal**      n/a
- Six Standards of CUP (see back)**

The statements provided are true and provide an accurate depiction of the proposed land use. I authorize that I am the owner or have permission to act on behalf of the owner of the property.  
 Submitted By:  Date: 6/21/2018

# **Six Standards of a Conditional Use Permit**

Provide an explanation on how the proposed land use will meet all six standards.

1. The establishment, maintenance or operation of the conditional use will not be detrimental to or endanger the public health, safety, comfort or general welfare.

The tower will not endanger or detriment public health, safety, comfort or general welfare.

Purpose of tower is to provide broadband internet services to the area, which should enhance all of the above.

2. The uses, values and enjoyment of other property in the neighborhood for purposes already permitted shall be in no foreseeable manner substantially impaired or diminished by establishment, maintenance or operation of the conditional use.

The tower location is on town land, and we are using the minimally necessary height to provide coverage as intended in our Wisconsin Public Service Commission grant, co/written with the Town of Dunn. The tower will be placed on Town of Dunn land to minimize impact.

3. That the establishment of the conditional use will not impede the normal and orderly development and improvement of the surrounding property for uses permitted in the district.

Tower location sited on town land, will not impact any other surrounding property uses or development.

4. That adequate utilities, access roads, drainage and other necessary site improvements have been or are being made.

Tower location sited on town land, provisions for utilities, access roads, drainage, and site improvements will not be affected.

5. Adequate measures have been or will be taken to provide ingress and egress so designed as to minimize traffic congestion in the public streets.

Ingress and egress to the site would be via existing Town of Dunn parcel driveways.

6. That the conditional use shall conform to all applicable regulations of the district in which it is located.

Tower will conform to all regulations as needed.

TO: Dane County Zoning & Land Regulation Committee

Re: CUP Application for communication tower on Town of Dunn parcel

To whom it may concern:

Hoyos Consulting is a local internet service provider operating in Dane County, and recently worked with the Town of Dunn to apply together for a FY2018 Round 2 Broadband Expansion Grant with the Wisconsin Public Service Commission. That grant was recently awarded to the Town and us by the WI PSC. The full grant application and documentation is also included in our application documents for review.

As part of this grant, provisions were made with the Town of Dunn for a 60ft communication tower to be constructed on Town of Dunn owned land (parcel 0610-212-9800-0). This tower will be used to provide much needed internet/broadband services in the area, using LTE/Wireless technology. The height of the tower was minimized as much as possible to a level to provide adequate coverage for the area. We believe that our project will provide a much-needed broadband option in areas that currently are completely underserved, or in some cases, not served by anyone, with minimal impact, considering the height of the tower.

Hoyos Consulting has the necessary engineering and operational experiences to make this project a success. Hoyos Consulting has additionally committed to provide \$32,417 towards project costs (a total of 51% of the total project cost of \$63,564).

If you have any questions regarding this CUP application for a tower, please do not hesitate to reach out to us via telephone at 608-616-9950 or email at [andrew@hoyosconsulting.com](mailto:andrew@hoyosconsulting.com)

Sincerely,

A handwritten signature in black ink, appearing to read "Andrew Hoyos", is written over a horizontal line.

Andrew Hoyos  
Owner  
Hoyos Consulting, LLC

<b>TOWER DETAILS</b>							
Applicant's Intended Purpose of Tower (e.g. coverage, capacity, other). Explain.		Provision of Fixed Wireless Internet Services					
Type of Tower (e.g. monopole, self-support lattice, guyed lattice, etc.)				Self Support Lattice			
Above Ground Level (AGL) Height (ft.) (i.e. maximum design potential).				100ft AGL			
Base/Ground Elevation (ft.)							
What is the "fall-down radius" (ft.) of the proposed tower?							
Technology to be Initially Sited on the Proposed Tower (e.g. Cellular, PCS, Radio, Television, Microwave, etc.) <sup>1</sup>				Fixed Wireless			
Number & elevation (Feet AGL) of Antenna Arrays to be Accommodated		1 100'	2 90'	3 40'	4	5	6
Is the primary sponsor of this tower a wireless service provider or a tower builder?		Yes		If a wireless service provider, please include FCC license number.		N/A	
To the best of the applicant's knowledge, will this tower be lighted?		<input type="checkbox"/> Yes	<input type="checkbox"/> No	If applicable, please explain in the box below to the greatest extent known in what manner the tower will be lighted.			
		<i>No</i>					
<i>Lighting Configuration: n/a, 100ft tower except from lighting.</i>							
Are there any mitigation measures being taken to minimize the visual impact of this tower? If so, explain. Attach an additional page(s) if necessary. Color of tower to be unpainted per Town of Dunn approval.							
<b>PRELIMINARY INFORMATION ON OPTIONS FOR COLLOCATION<sup>2</sup></b>							
What search area radius was used to determine the location of the proposed tower?						2mi	
Are there any existing towers or other potentially suitable structures in excess of 80 feet in height within a 1.5 mile radius? If yes, how many structures <u>total</u> are there?						<input type="checkbox"/> Yes	<input type="checkbox"/> No
<input type="text"/> structures. If yes, please attach map showing the location of these structures in proximity to the proposed tower.						<i>No, grant funded tower, no other towers willing to provide free long term access to tower</i>	

<sup>1</sup> Note that this statement does not preclude future placement of alternative technologies on this structure.

<sup>2</sup> Note that more detailed information regarding options for collocation and addressing s. 10.194(2) of the Dane County Code of Ordinances is required in the *Written Statement*.

Has the applicant examined each of the structures noted above to determine if an antenna array can or may be located on the structure?

Yes

No

*Yes, too costly, and  
recurring expenses not  
funded by grant.*

Assign a number to each of the existing structures noted above and briefly explain in the spaces below why each one will not accommodate the proposed antenna array (e.g. structurally incapable, owner unwilling to enter into a lease, etc.). Attach additional pages if necessary.		
1. All existing structures have extremely high monthly recurring charges, and were unwilling to work to enhance broadband service for residences in Town of Dunn.		
2.		
3.		
4.		
<b><i>SUBJECT PROPERTY AND SURROUNDING AREA</i></b>		
What is the current, primary use of the subject property (e.g. residential, agricultural, commercial, etc.)?	Town of Dunn – Town Hall and Highway Garage	
What are the current, primary uses of all properties adjacent to the subject property?	Town Hall	
What is the current zoning of all properties adjacent to the subject property?	RH1	
How far (in feet) is the proposed tower from the nearest structure on an adjacent property (not on subject property)? What is the current use of the structure?	~20ft, garage building	
Are there any small, private airports within a 3-mile radius of the proposed tower? If yes, give the name(s) and distance(s) in the box below.	<input type="checkbox"/> Yes	<input type="checkbox"/> No
	<i>No</i>	
<i>Name(s) and Distances of Private Airports: n/a</i>		
If applicable, have the listed private airports within a 3-mile radius of the proposed tower been notified of the petition?	<input type="checkbox"/> Yes	<input type="checkbox"/> No

Email address: [andrew@hoyosconsulting.com](mailto:andrew@hoyosconsulting.com)

Public Entity

Name of applicant: Town of Dunn  
Mailing address: 4156 County Road B; McFarland, Wisconsin 53558  
Telephone number: 608-838-1081  
Email address: [bkollenbroich@town.dunn.wi.us](mailto:bkollenbroich@town.dunn.wi.us)

- c. The proposed broadband expansion project is a public-private joint venture arrangement between the Town of Dunn, a municipal township in Dane County and Hoyos Consulting LLC, a boutique internet service provider specializing in fixed wireless/LTE networks, colocation, managed services and expert level network consulting. The arrangement between the Town of Dunn and Hoyos Consulting LLC is detailed in Exhibit D and Exhibit E.

#### 3.2.1.2 Description of the Project

a. **Map of the project area**

The project will take place in the Town of Dunn in Dane County. The Town is located just south of McFarland, and about 10 miles from the State Capitol. Please see Exhibits A and B for a map of the area that will be affected by the proposed project. The Town of Dunn and Hoyos Consulting are requesting that the grant help fund the expansion of broadband service for up to 1,836 homes in Dunn. These addresses are listed in Exhibit C.

**b. Additional documentation of actual broadband service**

According to the map provided by the Public Service Commission, all customers are located in an area that is considered “underserved”. An area west of the Yahara River and east of HWY 51 is not considered to fall under the Broadband Expansion Grant Eligible Area, however, according to conversations with residents and speed tests, this area experiences incredibly slow service. In addition, although much of the map shows that there is at least one telecommunications company providing service for a neighborhood, in reality, the actual number of providers falls well short of adequate. Furthermore, in conversations with Frontier, they have no plans to expand in the Town of Dunn, although around half of the Town is within their service region. Meanwhile, AT&T will not provide service to many of these customers because their company considers this Frontier’s “region”. The unfortunate result is that this area has turned into a pocket of limited service options and any line of sight fixed wireless service that is offered, can be very slow and spotty due to trees or hills interfering with the signal. The LTE based technology provided by Hoyos Consulting as part of this grant will be able to overcome these issues as these solutions are designed for non line of sight (NLOS) applications. Further, Hoyos Consulting has done pilot testing of this area to confirm signal levels and coverage, and currently has approximately 20 households using the service.

In addition to all potential customers being considered “underserved”, some residents in the area that Hoyos Consulting will cover are considered “unserved” as they have reported actual speeds below 5 mbps down and 600 kbps up. While only a few speed tests were conducted by residents, it can be assumed that there are many more people in these areas that would also be considered “unserved”. Exhibit F depicts speed tests that were done in the grant area on other ISP networks.

**c. Description of how the project will increase broadband access**

Potential and expected number of households served

The potential range of this broadband project will reach approximately 1,836 households. According to a letter of support from the Dane County Sheriff's Office (please see page 57), expanding broadband in the Town would help with their safety efforts to reach these households as the department releases alerts to the public about road closures due to accidents, chemical spills, or serious weather via broadband internet.

#### Potential and expected number of businesses served

In addition to the residential properties that could benefit from the Hoyos Consulting expansion, businesses within this range could also experience improved service. According to Google Maps and the Town of Dunn tax roll, there are 58 *known* businesses in this area that could benefit from broadband internet. These businesses are listed in Exhibit H. This does not include many of the numerous farming businesses that would be reached by this Hoyos Consulting service, or the residents who would like to work from home or start home businesses but cannot due to a lack of high speed internet. Such situations are detailed in the letters of support that are attached to this application.

One business in the potential service area that could particularly benefit from broadband internet is the Deer Park Buddhist Center located at 4548 Schneider Drive. As part of their operation, this buddhist monastery must connect with individuals from all over the world and conduct classes for students via the internet. In addition, the Dalai Lama frequently visits the Center and a stable and reliable high speed internet service is necessary for him to connect with officials from the US State Department and his security entourage. Despite these needs, the monastery does not have access to broadband and their telephone provider will not expand to their location. Their experience is detailed in the attached letters of support on page 64-66.

The farms that would be served by the Hoyos Consulting expansion lie within a designated State of Wisconsin Agricultural Enterprise Area (AEA). Exhibit G depicts where the AEA boundary lies in comparison to the Hoyos Consulting proposed service area. A goal of the AEA program is to support economic development of the agricultural economy by promoting agricultural investment and supporting programs that help farms stay economically viable. Being connected to the internet to purchase and sell equipment and goods, find vendors, connect with customers, connect with other farmers and farming organizations, access insurance and health care information, advertise for farm help, improve safety and security systems, and learn about new farming practices and machinery will ensure that these farming operations continue into the future and help satisfy the mission of the State's AEA program.

#### Expected number of seasonal residents and tourists served

Due to the Town's two lakes and proximity to Madison, there are quite a few visitors to the Town of Dunn. Many tourists come up to the Town to fish, boat, and spend time on lakes and expanding internet to the proposed area could encourage more people to visit their friends and family that live in the region. In turn, the Town's lake-oriented businesses like marinas, boat rental businesses, and bait stores will experience an increase in customers.

The Town also has a large number of "snowbirds" who only live here during the warmer months. According to a 2015 Town of Dunn survey, 27% of part time/vacation home residents responded that they would like increased internet speeds, 33% said they would like the quality of their internet service to be improved, and 40% responded that they would like improved service reliability. If the potential tourist population is reflective of these part time residents' opinions, there is a large desire for better internet service in the area.

#### Estimated download and upload speed of the broadband service

Hoyos Consulting broadband service would provide each resident and business in the coverage area with estimated speeds of up to 50mbps for downloading data and 5mbps for uploading data. These estimated speeds would improve download speeds in some areas by fivefold. Exhibit F depicts actual internet speeds in the Town of Dunn

#### **d. Statement indicating the specific broadband technology that will be used**

For this last-mile focused project, Hoyos Consulting proposes to utilize fixed wireless/LTE technology served from two tower locations: one new tower to be constructed on Town of Dunn property, and another from an existing Village of McFarland water tower, which is currently already in use for the pilot project. The advantage of this technology in this area is the possibility to service households with non line of sight connections.

#### **e. A description of the broadband service to be provided, including estimated download and upload speeds, whether the speed is based on dedicated or shared bandwidth, and the technology that will be used. This description may be illustrated by a map or schematic diagram, as appropriate.**

Hoyos Consulting would propose four speed packages, with the following costs:

- Up to 10mbps x 1mbps Basic Package = \$69.95/mo

- Up to 20mbps x 2mbps Standard Package = \$89.95/mo
- Up to 30mbps x 3mbps Advanced Package = \$99.95/mo
- Up to 50mbps x 3mbps Advanced Package = \$149.95/mo

Fixed LTE is a shared bandwidth amount per sector antenna, which can be scaled appropriately with more sector antennas and additional spectrum as the need arises. Furthermore, the backhaul capacity feeding the customer facing antennas would be able to be scaled as needed (licensed fixed wireless backhaul or fiber to the tower).

**f. A schedule by which the applicant intends to complete the components of the project**

The proposed timeline for the installation of the system, should a grant be awarded, would be as follows:

March/April 2018 - finalize bill of materials and order equipment

June/July 2018 - install new tower location + equipment, complete build on existing McFarland water tower.

Q3 2018 - ready for service for entire coverage area

**3.2.1.3 Itemized statement of funding request**

**a. An itemized statement of the investment and construction costs of the project**

Hoyos Consulting has provided a table illustrating all involved and eligible costs of the project, which is attached as Exhibit I.

**b. Statement that the grant will not subsidize the expense of the telecommunications provider or the monthly bills of customers**

Funds requested in this grant application will be used solely for the purpose of installing fixed LTE wireless equipment through this area and construction of a tower. No grant funds will be used for subsidizing operating costs, customer fees, or Hoyos Consulting's profits.

**c. Summary showing revenue source, including grant funds and matching funds for each expenditure itemized above**

The grant requested amount of 49% of the project costs would be \$31,146. Hoyos Consulting would provide matching funds (51%) of \$32,417 and the Town of Dunn would waive any Town permit fees for excavating in the road right of way, excavating Town highways, and allow for tower construction on Town property with no Town permit fee. The total project cost is \$63,564.

**d. Statement that the grant funds requested will be used for the sole purpose of constructing broadband infrastructure in underserved areas**

All grant funding will be used solely for the installation of broadband infrastructure in the underserved areas covered by this application.

**3.2.1.4 Priority factors supporting the application**

**a. Description of the matching funds the applicant will invest in the proposed project, if any**

Hoyos Consulting will provide 51% of the total project cost in the amount of \$32,417 and the Town of Dunn will waive any Town permit fees that are required for this project, including in-kind land use for the construction of a tower on Town property.

**b. Description of any public-private partnership involved in the project**

In order to expedite this project installation and make it more cost effective for Hoyos Consulting, the Town is committed to waiving fees for any permits at the Town level (a letter from the Town detailing this commitment is attached as Exhibit D). Hoyos Consulting would contribute \$32,417 to the project and provide the total build out, engineering, activation, marketing/sales of the service and installation of customer side equipment beyond the initial 50 subscribers. (Hoyos Consulting's commitment of funds is detailed in Exhibit E).

**c. List of broadband service providers currently serving the area the applicant proposes to serve**

Hoyos Consulting will deliver broadband through fixed wireless LTE to this area. Below are the companies and service type that were pulled from the broadband map at [broadbandmap.wisconsin.gov](http://broadbandmap.wisconsin.gov). Based on conversations with residents, it is clear that these providers are not available in the neighborhoods that are shown on the PSC map. In addition, the providers listed below were pulled from every part of the Town that could

be reached by Hoyos Consulting, so not every provider is listed by the PSC in every area of the Town. It is unknown how many customers are within each provider's footprint. An image of the PSC broadband map is shown in Exhibit J.

<u>Broadband Service Provider</u>	<u>Type of Service</u>	<u>Reported Download Speed</u>	<u>Reported Upload Speed</u>
Charter Communications Inc	Cable Modem	100 Mbps	5 Mbps
AT&T Wisconsin	Wireline	0.768 - 75.0 Mbps	0.384 - 8.0 Mbps
TDS Telecommunications Corporation	Wireline	4.0 Mbps	0.512 Mbps
Frontier	Wireline	1.0 - 24.0 Mbps	0.128 - 2.0 Mbps
dishNET Satellite Broadband LLC	Satellite	10 Mbps	1 Mbps
Skycasters	Satellite	2.0 Mbps	1.3 Mbps
ViaSat Inc	Satellite	25.0 Mbps	3.0 Mbps
HughesNet	Satellite	15.0 Mbps	2.0 Mbps
Sprint	Mobile	No Speed Reported	No Speed Reported
T-Mobile	Mobile	No Speed Reported	No Speed Reported
Verizon Wireless	Mobile	No Speed Reported	No Speed Reported
US Cellular Corp	Mobile	No Speed Reported	No Speed Reported
AT&T Mobility	Mobile	No Speed Reported	No Speed Reported

**d. Description of the geographic area and population that will be served by the project**

Hoyos Consulting will construct/build two tower locations for the initial service area, one located at the Town of Dunn town garage, the other located in the Village of McFarland (existing Burma Water Tower, now currently running with a pilot project and approximately 20 live households). The initial coverage maps show service being

available to approximately 1,836 households and 58 known businesses. We are assuming that the grant will fund the initial 50 subscribers (approximately 3% take rate).

**e. A description of how the proposed project could expand or improve the broadband service it delivers, while maintaining the quality of its broadband service**

The initial coverage area of the fixed LTE network can easily be expanded in the future by creating additional points of presence and transmitter locations, both for expanding coverage, and creating smaller cells in order to provide more usable bandwidth for existing customers. Hoyos Consulting is committed to expanding the network to service customers that may not be covered by the initial service area. This expansion could include residents outside of Dunn, such as the towns of Rutland or Pleasant Springs, thereby creating a multi-municipal service in other areas that are considered underserved, using the same technology, and the grant funded network as a stepping stone for growth. The grant will only fund the initial 50 subscribers, subsequent subscribers and associated costs would be funded 100% by Hoyos Consulting.

Furthermore, once a customer base has been established, backfilling households with fiber to the home (FTTH) technology becomes an option, as those pockets of existing customers are identified and scales of costs can be realized.

**f. A description of how the proposed project will promote job growth or retention, expand the property tax base or improve the overall economic vitality of the municipality or region**

As mentioned above, part of Hoyos Consulting's proposed service region lies within a designated State of Wisconsin Agricultural Enterprise Area (depicted in Exhibit G). By expanding internet to farms within this AEA region, the Town and Hoyos Consulting would be supporting economic development in a region that the State of Wisconsin has already designated as a priority area for promoting economic stability and growth. Furthermore, as mentioned in 3.2.1.4.e, once the initial project is installed, Hoyos Consulting could expand beyond the proposed boundary and branch out to more nearby farms that are within the State's AEA.

In addition to the benefits this project could bring to a State-recognized AEA region, home prices, along with the Town's tax base, could also increase. The Town has heard from numerous prospective buyers that they are hesitant to move into the Town of Dunn because of the lack of internet options. Buyers have even lowered their offers to

compensate for the lack of broadband and one buyer backed out of a sale when the family found out that they could not receive high speed internet. Research from numerous studies backs up these stories from Town residents. For instance, a 2014 study from UW-Whitewater found that seasonal and recreational homes with internet access were worth \$11,815 more than properties without access. Additionally, Professor Steven Deller at UW-Madison has found that in remote rural communities (nonmetro counties that are not adjacent to metro counties), when there is a 10% increase in the number of homes that have access to cable technology, median home values rise by 0.755%. Based on this information, the Town anticipates that home values could slightly increase due to this new internet coverage.

Residents have also complained that telecommuting, which is often a requirement of jobs, is either incredibly difficult or impossible with the slow internet that is offered to Town residents. This is particularly frustrating since the Town is only 10 miles from Madison so employers assume high speed internet is available at home. One resident even lost his job when it was discovered that he could not telecommute. Likewise, businesses in the area have expressed concerns about not being able to expand their operations or connect with clients. Please see the attached letters of support from residents to learn more about their employment and business struggles without internet.

**g. A description of whether the proposed project will or will not impair the ability of a broadband service provider or competing broadband service provider to extend broadband service to areas adjacent to the proposed project area**

The proposed Hoyos Consulting project would not impact any broadband provider from extending to areas adjacent to this project area.

**3.2.1.5 Other information supporting the application**

**a. Description of applicant's history or experience constructing broadband communications facilities in the state and elsewhere**

Hoyos Consulting has been providing fixed wireless internet services, as well as providing network consulting and operational expertise to a large number of other internet service providers in the State of Wisconsin since 2010.

The owner of Hoyos Consulting, Andrew Hoyos, was heavily involved in the grant application and construction of the Metropolitan Unified Fiber Network (MUFN), which was a \$5.1 million grant by the NTIA in the first round of the BTOP grants.

**b. A description of how the proposed project will or will not duplicate existing broadband infrastructure**

As of the date of the grant application, there are no available fixed LTE wireless providers which are able to provide the speeds proposed. Additionally, although the PSC broadband map lists multiple telecommunication companies as being available to Dunn residents, in reality, there are not many options for consumers. For instance, in the Town's conversations with Frontier, the company has stated that they have no plans to expand in the Town of Dunn, although around half of the Town is listed as within their service region. Meanwhile, AT&T will not provide service to many of these customers because their company considers this Frontier's "region". The unfortunate result is that there are numerous pockets of underserved neighborhoods. Hoyos Consulting would be able to fill in these gaps and finally provide residents with a broadband option.

**c. A description of how the proposed project will affect the ability of individuals to access health care service from home, including any impact upon the costs of those services.**

As more and more hospitals and clinics transition to providing information and reaching patients online, Town of Dunn residents are missing out on these opportunities. This is especially worrisome as Town residents are only 10 miles from hospitals such as UW, Meriter, St. Mary's, American Family Children's Hospital, Stoughton Hospital, and the VA. According to a letter from the Director of Ambulatory Access and the Program Manager of Telehealth at UW Health (please see page 58), increasing broadband supports the hospital's goal of expanding patient access to health care. This is accomplished by:

- Connecting with patients through the online patient portal, MyChart
- Sharing medical information, visit summaries, and test results through MyChart
- Allowing patients to more easily look up doctors and hospitals
- Creating access to UW Health providers through e-visits and video visits.

Providing Dunn residents with broadband will help UW Health and other healthcare providers better connect with patients and deliver faster, more affordable care.

**d. A description of how the proposed project will affect the ability of students to access educational opportunities from home.**

The Town has gathered letters of support from the three school districts that cover our municipality. You can read these letters in the attachments on pages 59-61. These letters make it abundantly clear that in today's connected world, if students in our Town do not have access to the internet, they fall behind their peers. The local Oregon School District refers to this as the "homework gap" because not all students have access to the internet at home to continue learning after school.

In Oregon, teachers use online learning systems like Google Classroom to organize learning and deliver instructions and students are asked to perform research online, access databases, and research sources. Students and staff also collaborate online, view multimedia content, create online produces, and curate digital portfolios to showcase their accomplishments.

Likewise, educators in the Stoughton School District are moving curriculum development from physical textbooks to an online format. Projects are then expected to be completed electronically, however when students travel back to their homes in Dunn, they become disconnected and are at a disadvantage for finishing homework.

Finally, the Town's third school district, McFarland, has moved toward a "1:1 education model" where schools provide students their own technology device which is used throughout the day. Students will complete assignments, work with other students, and submit homework on their devices. Broadband internet is required for Dunn students to interact with their peers on these technology devices.

**e. A description of actions taken by a city, village, town, or county in support of the grant application**

The Town has assisted in writing this grant application; has secured letters of support from residents, businesses, and elected representatives; and will waive the fee for applying for any permits at the Town level. Additionally, as part of this project, the Town Board has indicated its support for allowing Hoyos Consulting to erect a tower near the Town's highway garage and staff will assist Hoyos with applying for any necessary County permits. The Town has also sent out surveys asking for resident input on internet service and incorporated these responses into its Comprehensive Plan. The Town has also worked over many years to meet with residents and telecommunication companies to persuade companies to serve Town residents with high speed internet and even formed a Telecommunications Committee in 2010 to further research how to bring high speed internet to the Town.

f. **Other equitable factors that the applicant desires to include**

Business and resident complaints regarding internet service

For many years, the Town of Dunn has received complaints from businesses and residents that internet service in this area is slow, unreliable, and prohibitively expensive. While the Town has experienced some success in encouraging telecommunications companies to expand broadband internet in Dunn, service is still slow and spotty in this area and service has not been extended here. Hoyos Consulting would be able to provide internet to the area that is experiencing inadequate service and eliminate these issues.

Businesses have also stated that it is difficult to reach their clients and advertise their services. This is particularly difficult for farmers and horse ranches in the Town that rely on the internet to connect with restaurants, clients, and customers. Expanding high speed internet to these businesses will ensure that they can continue to operate and succeed.

Wisconsin Agricultural Enterprise Area (AEA)

As mentioned above, part of Hoyos Consulting's proposed service region lies within a designated State of Wisconsin Agricultural Enterprise Area (depicted in Exhibit G). By expanding internet to farms within this AEA region, the Town and Hoyos Consulting would be supporting economic development in a region that the State of Wisconsin has already designated as a priority area for promoting economic stability and growth. Furthermore, as mentioned in 3.2.1.4.e, once the initial project is installed, Hoyos Consulting could expand beyond the proposed boundary and branch out to more nearby farms that are within the State's AEA.

Amending Town plans to address internet complaints

To gauge residents' broader opinions on internet service the Town of Dunn sent out surveys in December 2015 asking "What, if any, challenges with internet service in the Town do you think need to be addressed? Please check all that apply." Hoyos Consulting's new service would be able to address the top five complaints listed below:

1. Lower costs: **55.9%**
2. Increased number of internet service providers: **44.76%**
3. Improved quality of internet service providers: **39.3%**
4. Improved internet speeds in my area: **38.65%**
5. Improved service reliability in my area: **38.21%**

6. Providing service over the mobile/cellular network: **16.81%**
7. Other: **10.92%**
8. This questions does not apply to me. I do not have/use the internet at home: **7.86%**

In response to these answers, the Town added a component to its Comprehensive Plan that lists expansion of broadband internet as a goal within the Town's Utilities & Community Facilities Chapter. The Hoyos Consulting project would fall under three broadband internet goals listed in the Comprehensive Plan:

- Pursue grant funding, other collaborative opportunities, and creative uses of funding to expand affordable, broadband internet.
- Encourage public-private collaboration when installing broadband internet infrastructure.
- Obtain and assemble maps from internet service providers of their broadband facilities or service areas.

#### Advantage of Hoyos Consulting over other broadband proposals

When the Town has asked telecommunication companies to expand broadband internet to Dunn, many companies have stated that expanding infrastructure is too costly and therefore they are not interested in providing service to the Town's residents. The public-private agreement between the Town and Hoyos Consulting, mixed with a PSC grant to help pay for infrastructure costs, will be an innovative way to overcome this barrier. Another comment the Town often hears is that telecommunication companies will only provide service with line of sight or satellite technology so that they do not have to build new lines. Unfortunately, many areas in the Town are blocked by hills and trees so line of sight technology will not work and satellite is often blocked by trees and clouds, resulting in sporadic internet service. Since the Hoyos Consulting proposal is based on LTE technology, non line of sight installations become an option for most households and businesses in the coverage area.

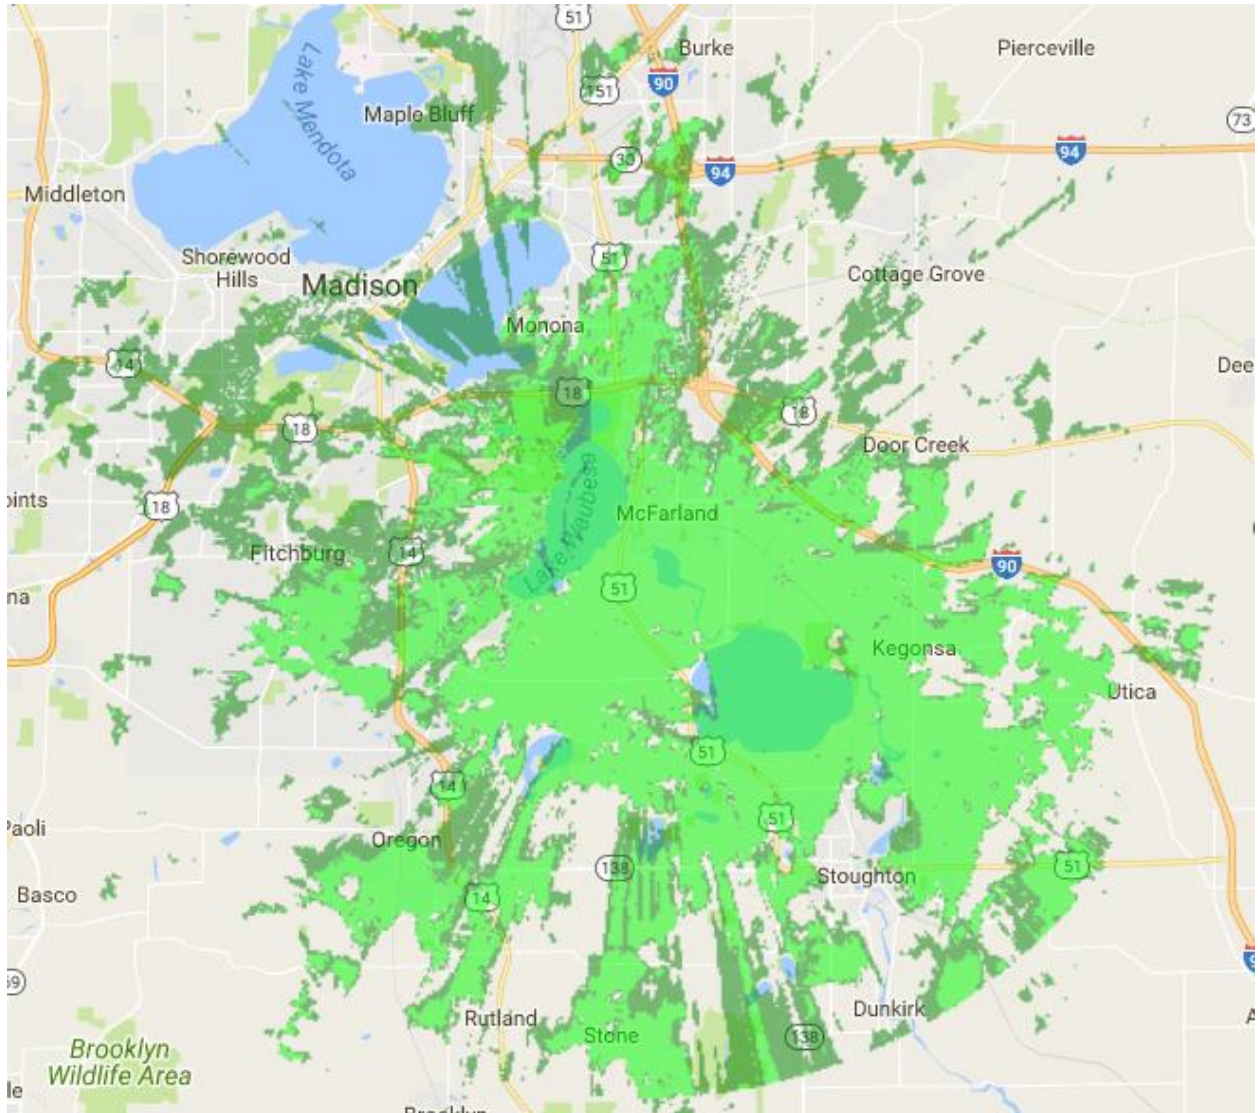

#### Conclusion

In summary, the Town of Dunn and Hoyos Consulting believe that this proposal will improve the Town's economy by providing existing businesses with the tools they need to connect with clients and promote their services while improving the value and salability of homes. In addition, new job growth could occur with high speed internet as more residents could start small home businesses, have the option to work from home, or be able to move to the Town of Dunn because internet is available. Finally, new jobs will be created as technicians will be hired by Hoyos Consulting in order to support this service. Attached to this application, you will find letters of support from various

residents, businesses, organizations, and elected representatives, along with a resolution from the Town of Dunn in support of broadband internet expansion.

Andrew Hoyos  
Hoyos Consulting

Dear Mr. Hoyos,

The Town of Dunn would like to extend its support for Hoyos Consulting's application for a Broadband Expansion Grant in order to expand service in the Town of Dunn.

For many years, the Town of Dunn has received complaints from businesses and residents that internet service in this area is slow, unreliable, and prohibitively expensive. Hoyos Consulting's new service will deliver critical internet infrastructure to this region and alleviate these concerns. This service will improve the Town's economy by providing existing businesses with the tools they need to connect with clients and promote their services. It will foster economic growth as the residents in this area will be able to start or expand home and agricultural businesses, have the option to work from home, or be able to move to the Town of Dunn because high speed internet is available. In addition, many families have expressed frustration that their children cannot do their schoolwork without high speed internet and that they are falling behind in the 21st century educational system. Providing Hoyos' service to the Town would ensure that all of the Town's children are receiving equal opportunities to succeed.

In order to expedite this installation and make it more cost effective for Hoyos Consulting, on June 19, 2017, the Town Board voted to waive fees for any permits at the Town level. The Town Board also indicated their support to allow a tower to be constructed near the Town's highway garage on Town-owned property as part of this project.

Thank you again for considering the Town in your expansion plans.

Sincerely,

Edmond Minihan  
Town of Dunn Chair

Re: FY2018 PSC Broadband Expansion Grants (Round 2)

Dear Mr. Kollenbroich:

Hoyos Consulting is excited to be working in partnership with the Town of Dunn to apply for a FY2018 Round 2 Broadband Expansion Grant.

We believe that our project will provide a much needed broadband option in areas that currently are completely underserved. Hoyos Consulting has the necessary engineering and operational experiences to make this project a success.

Hoyos Consulting has additionally committed to provide \$32,417 towards project costs (a total of 51% of the total project cost of \$63,564). Upon grant approval, this is a "shovel ready" project that we are ready to execute immediately.

We look forward to working with the Town of Dunn on this project.

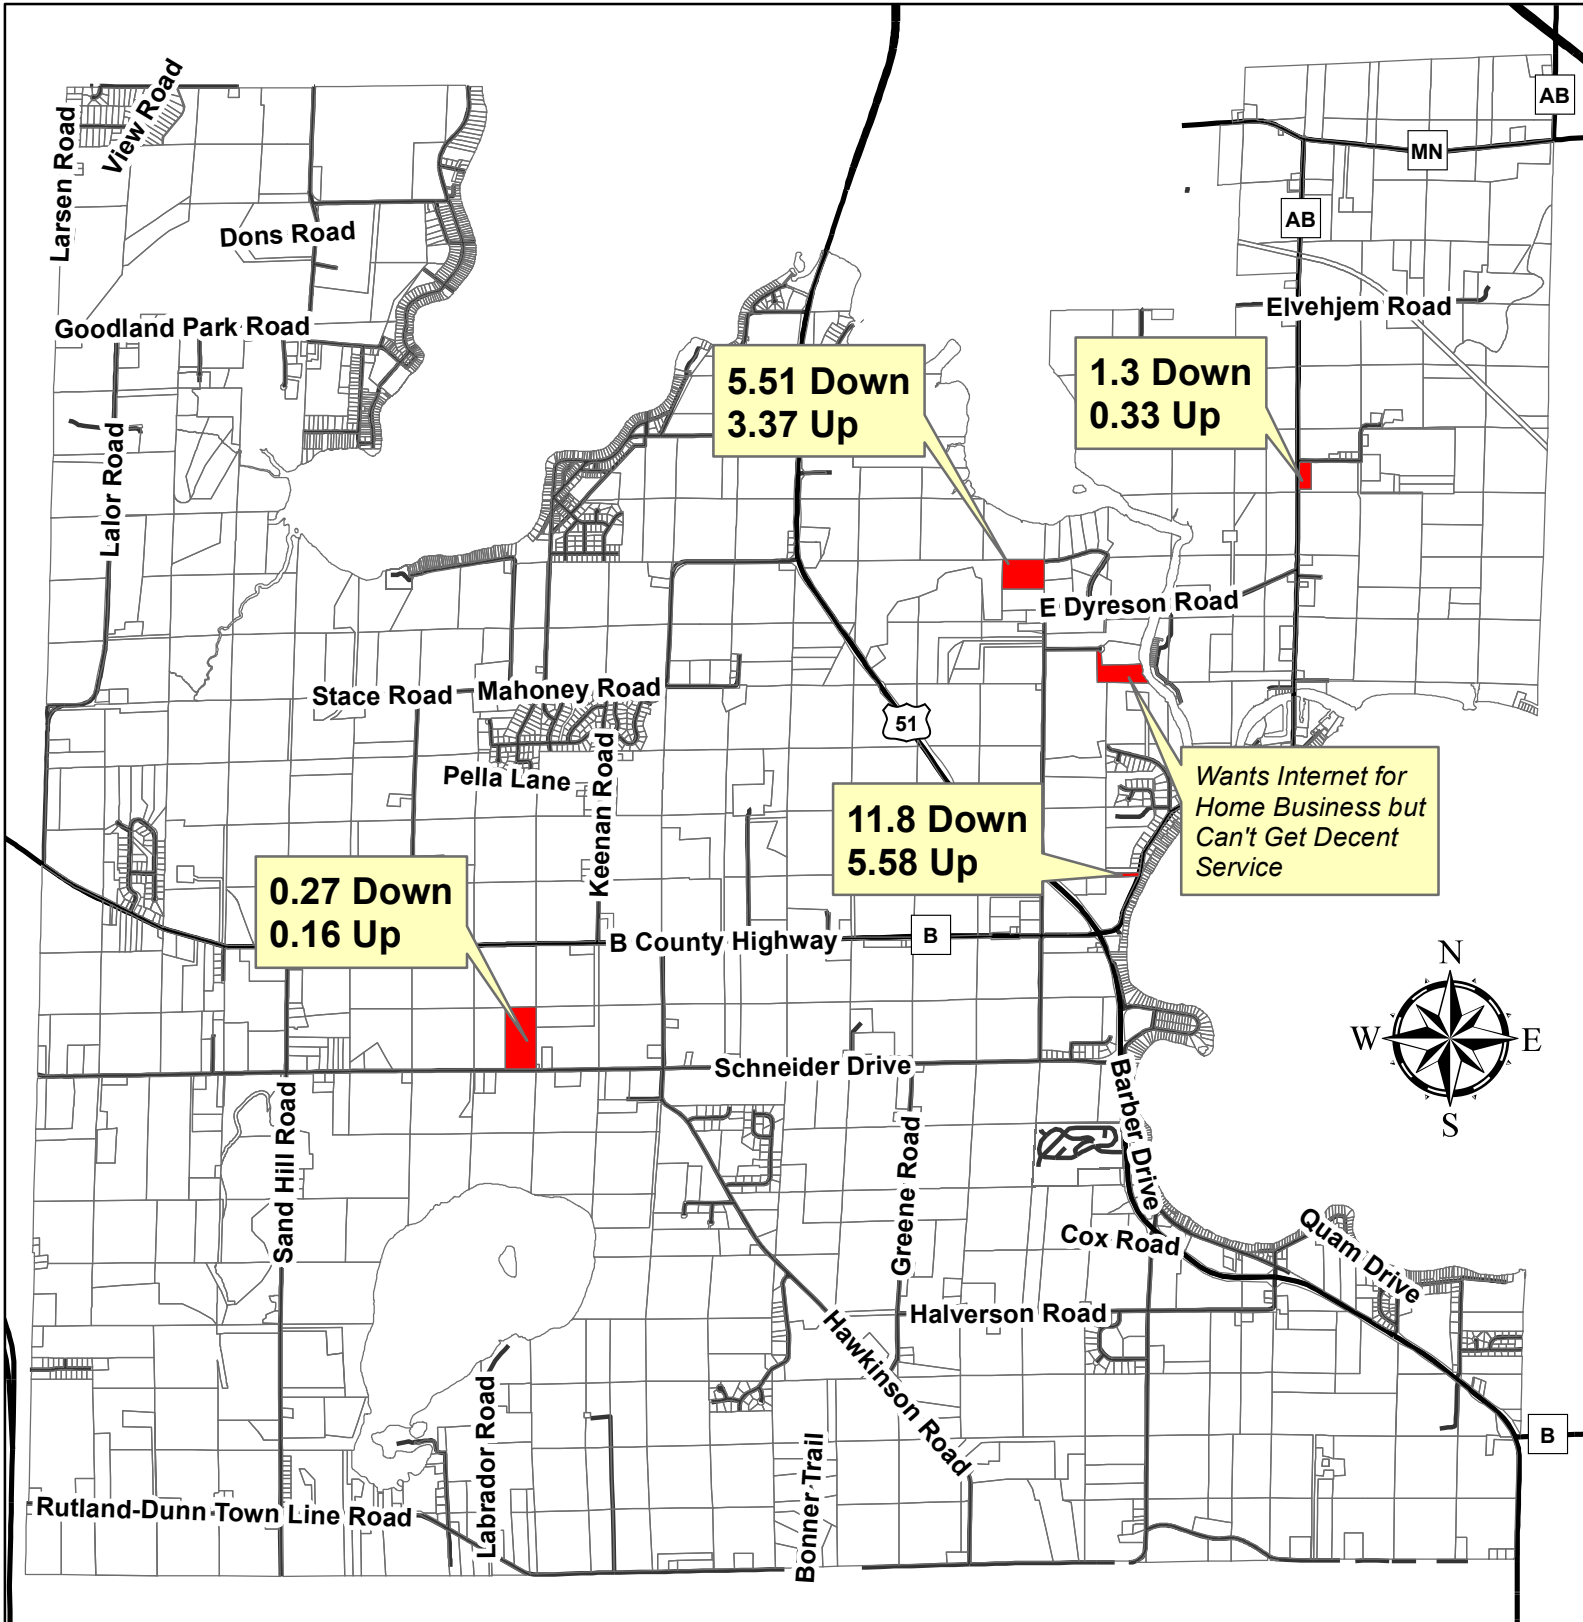

If you have any questions, please do not hesitate to reach out to us via telephone at 608-616-9950 or email at [andrew@hoyosconsulting.com](mailto:andrew@hoyosconsulting.com)

Sincerely,

A handwritten signature in black ink, appearing to read "Andrew Hoyos", is written over a thin horizontal line.

## PSC Broadband Map of the Town of Dunn

RESOLUTION 2016-09  
TO SUPPORT THE EXPANSION OF BROADBAND INTERNET IN THE TOWN  
OF DUNN

WHEREAS, broadband internet is vital business operations including farm and agricultural businesses, promotes commerce by connecting purchasers to vendors, supports telecommuting, is required for academic work for K-12 students and vocational and university students, promotes tourism throughout Wisconsin, promotes connecting and engaging with government agencies, health services, senior services, provides improved safety and security through internet monitoring, and

WHEREAS, many businesses and residents in the Town of Dunn have internet that is slow, unreliable, expensive, or limits data unreasonably; and

WHEREAS, broadband internet expansion would resolve the internet issues and expand economic development in the Town;

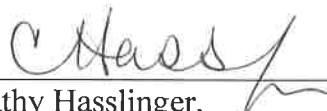

THEREFORE, BE IT RESOLVED That the Town of Dunn supports the expansion of broadband internet and hereby authorizes Ben Kollenbroich to apply for a Public Service Commission Broadband Expansion Grant and utilize all other necessary measures to advance the availability of high speed internet to Town of Dunn residents.

Dated this 16<sup>th</sup> day of May, 2016.

Public Service Commission of Wisconsin  
610 N. Whitney Way  
PO Box 7854  
Madison, WI 53707

To Whom It May Concern:

I write in support of the Broadband Expansion Grant Application submitted to the Public Service Commission of Wisconsin to aid the Town of Dunn, located in Dane County in my congressional district. As both the representative in Congress for Wisconsin's Second District and a co-chair of the bipartisan Rural Broadband Caucus, I am a strong supporter of an array of policy solutions and programs that will expand broadband access for underserved communities across our State.

The results of a survey conducted in 2015 concluded that nearly 40 percent of Town of Dunn residents stated that they would like increased internet speeds and greater reliability. In recent years, the Town has received numerous complaints from members of the community that internet service is costly, very slow and they cannot rely on regular access. These challenges put keep Dunn residents from fully living in the 21<sup>st</sup> century.

By building up a fast and reliable broadband network, Town of Dunn residents will greatly benefit from enhanced opportunity to operate a business from their home or telecommute. In addition, the area agricultural and real estate industries will operate with more efficiency, which can grow the local economy. Students will be able to complete their assignments and better compete with their peers in the classroom.

For these reasons and many more, I have been a champion throughout my time in Congress for the expansion of broadband service in rural areas throughout the 2<sup>nd</sup> Congressional District. PSC funding support will allow for necessary upgrades to quickly be made to improve broadband service in the Town of Dunn. Please give this application your fullest and fair consideration. Do not hesitate to contact me with any questions you may have. Thank you for your attention to this request.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Mark Pocan', written over a circular stamp or mark.

Wisconsin Public Service Commission  
P.O. Box 7854  
Madison, Wisconsin 53707-7854

RE: Broadband Grant Application by the Town of Dunn, Dane County

Dear Ms. Paske:

I write to offer my full support for the Town of Dunn's application for a 2017 Broadband Grant.

Remarkably, just a short distance from metropolitan Madison, Town of Dunn residents experience regular slow, expensive and unreliable internet service.

My constituents simply wish to live in the 21<sup>st</sup> Century like most everyone else in Wisconsin. They seek reliable, affordable, fast internet service in order to access vital information and healthcare, participate in e-commerce, run a business, support and expand agricultural operations, prepare school work, and connect with government agencies, family and friends. My constituents, too, wish to employ internet services in the hundreds of ways many of us are able to throughout our day.

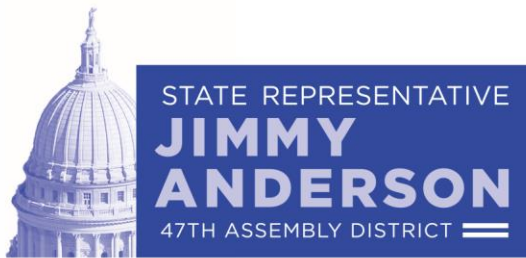

The Town of Dunn enjoys my backing for their Broadband Grant application. After a thorough and objective consideration by the committee tasked with reviewing applications, I hope the committee finds the Town of Dunn deserving of a Broadband Grant.

If you have any questions for me, please call me at 608-266-9170.

Thank you for your consideration.

Sincerely,

Mark Miller  
State Senator  
16th Senate District

June 12<sup>th</sup>, 2017

TO: Wisconsin Public Service Commission

RE: Town of Dunn application for a Broadband Expansion Grant

I am writing to express my full-throated support for the Town of Dunn's application for a broadband expansion grant.

The economic future of Dane County relies prominently on education, science, and technology. Leaving residents of Dane County without access to high quality broadband paralyzes our economic growth and unfairly leaves citizens behind through no fault of their own. The Town of Dunn is a wonderful community but it needs broadband access to attract talent and create jobs in Dane County.

During the hottest days of the year last July, I knocked on doors in the Town of Dunn and spoke to many of my soon to be constituents. Everyone was concerned about their schools and their roads, but what I was surprised to learn was how concerned Dunn residents were about their poor Internet access. Whether it was opportunities to work from home or how weak Internet signals affected home values or concerns from parents that their children didn't have the same research opportunities as other students, the need for greater broadband access was plain.

I cannot reiterate enough my support for a Broadband Grant for the Town of Dunn. It will help bring people and high paying jobs to the wildlife reserves surrounding Lake Waubesa, both within Dane County and across the state, it will improve student achievement in schools, and it will make sure that our infrastructure investments leave no community behind.

Thank you.

Sincerely,

Jimmy Anderson  
State Representative  
47<sup>th</sup> Assembly District

**ROBB KAHL**  
STATE REPRESENTATIVE

May 17, 2016

TO: Wisconsin Public Service Commission

RE: Town of Dunn application for a broadband expansion grant

I am writing in support of the Town of Dunn application for a broadband expansion grant.

When I was first elected to the Wisconsin Assembly, I received a call from a resident of the Town of Dunn who had obtained employment with Apple Computer in a position that would have allowed him to work from home – just as thousands of other internet support professional do in municipalities elsewhere in Wisconsin and the United States. Unfortunately, my constituent lost his job with Apple due to the lack of broadband access.

The Town of Dunn has received numerous complaints from businesses and residents that internet service in the Town is slow, expensive, and unreliable. In a survey the Town sent out in December, almost 40% of respondents said that they would like internet speeds to be increased and reliability to be improved in their area.

This is making it incredibly difficult to run a business and do school work in 2016.

Families in the McFarland School District residing in the Town of Dunn struggle to sign-up their children for summer school courses. While parents in other portions of the district have access to broadband and are able to sign-up their children up for classes the second enrollment opens, parents in the Town of Dunn struggle with slow internet speeds and internet that is often unreliable. Students in the McFarland Schools are provided I-Pads once they are in second grade and, increasingly, those I-Pads are an integral part of homework assignments. Due to the lack of broadband access, students in the Town of Dunn are often at a disadvantage.

People are shocked when I tell them that if they depart the Capitol and drive only 10 minutes away they will find themselves in an area where broadband access does not exist. I fully support the Town of Dunn grant application and hope the application for funding is approved.

Thank you.

Sincerely,

Robb Kahl

RE: Broadband Expansion Grant Program

Dear Commissioners:

I am writing to you on behalf of the Dane County Sheriff's Office in support of the Town of Dunn and their application for the Broadband Expansion Grant Program.

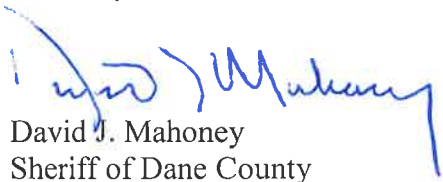

Due to the rural landscape of the Town of Dunn, broadband access is not available to all citizens. For those that do reach out to acquire this service from providers, it can be quite costly. The cost is prohibitive for the small dairy businesses and the home business firms, limiting the opportunity for economic growth within the township. Community Supported Agriculture needs to connect to their clients.

The safety of citizens in Dane County is paramount for the Sheriff's Office. Having broadband available to all township residents would be of great benefit. The Sheriff's Office frequently puts out safety alerts that the public needs to be aware of, such as road closures due to accidents, chemical spills or serious weather conditions.

The Town of Dunn, in partnership with broadband providers, will improve the economic infrastructure. Bringing broadband services to their residents, without a substantial cost, along with increased speed and stability of the network, will ensure that the community will be safe in times when public safety announcements need to be made.

Thank you.

Sincerely,

  
David J. Mahoney  
Sheriff of Dane County

DJM/slm

To: Public Service Commission

From: UW Health

Subject: Support for Town of Dunn Broadband Expansion Grant Application

---

Affordable broadband access at world-class speeds is critical to the future of Wisconsin. It has become a necessary tool for education, health care, economic development, agriculture, and government. That need will only continue to grow. All Wisconsinites, no matter where they live – in a city or in the rural countryside – need and deserve access to online information and services.

We are writing in support of the Town of Dunn Broadband Expansion Grant Application to ensure robust broadband is available. Increased access to high-speed reliable internet connections support our goal of expanding patient access to health care, including:

- Connecting with patients through our online patient portal, MyChart;
- Sharing medical information, such as visit summaries and test results, with patients through our online patient portal;
- Allowing patients to more easily look up doctors/hospitals; and
- Creating access to UW Health providers through e-Visits and video visits.

Thank you for your consideration and support of broadband.

Respectfully Submitted,

Elsa Drews Jacobson, Director of Ambulatory Access & Telehealth  
Sarah Orth, Program Manager of Telehealth

OREGON SCHOOL DISTRICT

Oregon School District

Oregon, WI 53575  
[www.OregonSD.org](http://www.OregonSD.org)  
608-835-4000

June 5, 2017

To the Wisconsin Public Service Commission:

The Oregon School District strongly supports the Town of Dunn's application for a Broadband Expansion grant. This is a necessary step to provide adequate Internet access to students residing in the Town of Dunn.

Internet access has become a crucial part of modern learning. Teachers use online learning management systems such as Google Classroom to organize learning and deliver instruction. Students perform research online, accessing updated information from a variety of educational providers, databases, and research sources. Students and staff collaborate online, view multimedia content, create products which demonstrate their learning, and curate digital portfolios to showcase their accomplishments. Students are expected to submit many of their assignments online. All of these require broadband Internet access.

The District provides robust, ubiquitous Internet access in our schools to support our modern learning environment. However, when students go home at the end of the day, many are not able to access the Internet, or have a slow connection which does not allow them to access the full range of online resources that are used in school.

Students without broadband Internet access are at a disadvantage. This is a widespread problem which is sometimes referred to as the "homework gap" because not all students have sufficient Internet access at home to continue learning after school.

Expanding broadband access in the Town of Dunn would help alleviate this inequity for its students.

The District fully supports the Town of Dunn's application for the Broadband Expansion Grant, because it will help students achieve their academic and career goals and prepare them for a productive future.

Sincerely,

Jon Tanner  
Technology Director

# Stoughton Area School District

**Technology Department**

320 North Street  
Stoughton, WI 53589-1733  
(608) 877-5051

June 8, 2017

As our society evolves into the information age, the gap continues to widen in what many refer to as the digital divide. The term digital divide alludes to the social and economic inequality between those who do not have the access or skills to use the same technology within a geographic area. As you can imagine, public schools are faced with this issue as curriculum development quickly migrates from physical textbooks to an online format. In addition, educators see the benefits of creating assignments and projects that are to be completed electronically. As a result of this shift, many students are at a huge disadvantage when they leave our doors and become disconnected at home.

The Town of Dunn is faced with this divide as a result of slow, expensive, and unreliable internet service. The Stoughton Area School District fully supports the Town of Dunn in seeking to expand broadband services to its residents to help close the gap. We believe this project will be an important investment for the Town of Dunn and will have a profound impact on our community.

Sincerely,

Paul Vande Hei  
Director of Technology

Wisconsin Public Service Commission

To Whom It May Concern:

In recent years, McFarland School District has experienced increased usage of internet both in school buildings and at home and has moved toward a 1:1 education model in a majority of our grade levels, providing all students with their own technology device. These devices are used in nearly all facets of their education. At home, our students complete homework and assignments on their devices, as well as collaborate on and submit projects through the internet. Reliable and fast internet at a reasonable cost is a must for these students to fully interact with their peers.

We fully support expanding broadband internet service to the Town of Dunn. Internet is an essential part of schooling in the School District of McFarland and having fast, reliable internet access for all of our students would be a great benefit to our community.

Please contact my office at 608-838-4550 with any further questions.

Sincerely,

Andrew Briddell  
Superintendent

June 3, 2016

Dear Wisconsin Public Service Commission,

I am writing in support of expanding broadband internet to the Town of Dunn residents. I am the Director of Senior Outreach Services for the Village of McFarland. We provide outreach and case management services to Town of Dunn seniors over the age of 60, their families and caregivers. The internet has become a valuable tool in accessing and providing outreach services. Having better and faster connection would be an asset to seniors wanting to remain in their homes in a rural setting.

Most of the financial resources we try to secure for individuals are available on line. Applications for Medicaid and Food share are digital. Both Medicare and Social Security has been promoting more services online such as applying for benefits, benefit statements, exploring coverage for health services and billing. Making informed choices regarding Medicare D prescription coverage is possible only on a website. It is no longer considered optional but a requirement.

Senior Outreach Services provides a monthly newsletter listing current resources, activities and educational programs available. Our current email subscriptions are double that of a mailed version. Notices of changes or last minute events along with reminders are done via email. Our Village newsletter is looking at the future of a hard copy vs digital access in an effort to reach more people and be more cost effective. That may be something our department will explore in the next year or two.

Other supports to seniors have changed too as families are no longer living in close proximity. Providing a fast reliable way to interact with loved ones helps reduce isolation and provides families with ways of caregiving from a distance.

Even health care providers are utilizing tele-health to minimize trips to physicians' offices and provide a link to clinical services so people can remain in their own environment for medical services.

Upgrading internet services is critical to everyone but especially to seniors whose quality of life may depend on it.

Sincerely,  
Lori Andersen  
Director  
McFarland Senior Outreach Services

RE: Internet access for Town of Dunn

Initially, we had contacted Frontier Communications to get internet access for our farm here in the Town of Dunn about 10 miles from the Capitol. For over four years many times we could not access the internet even though we were paying for it. The download was .27 Mbps and the upload .16 Mbps when we could access it. We were paying for 3.0 Mbps. City folks have a 65.0 Mbps. When it worked, it was very slow and you could not see video. After four years of paying for the service and not receiving it, we filed a claim in small claims court. We won and Frontier had to pay back some of our money. We cancelled our phone services with them.

We learned that Frontier had run a fiber optic cable from Chicago, but they selected other areas of Wisconsin to provide the service where there are more customers. The technology (computer boards) that are needed to upgrade our system are only a few miles away sitting in the Frontier Sun Prairie office.

We asked AT&T if they would provide service since they run a fiber optic cable across our driveway. They used the excuse that our home was not in their service area. That law was dropped many years ago.

We did file a complaint with the FCC. AT&T contacted us and said that they could not provide internet access in our area which is not true.

We contacted Leah Linscheid of Channel 3 TV here in Madison about our lack of internet access and she did several stories on internet access problems. She said that they had more calls on this topic than any other.

For our business we have to have internet access to deposit check remotely, interact with clients, purchase goods, connect with government agencies, and financial institutions.

Our only option is to connect a "hot spot" with our cell phones and purchase boosters. U.S. Cellular is our current provider and they charge us per the amount of data we use. The past month our statement was \$424.30. This month our bill will go over \$500! And that does not include using video. If we wanted to watch video the data amount would cause our bill to be many times more! We do get the 4 GB speed, so we could watch video but it is totally cost prohibited.

When we travel to Europe to purchase horses for resale at our farm, high speed internet access is everywhere and accessible for a nominal fee.

Please approve a solution for access that will be cost effective for our farm and our neighbors.

March 5, 2017

Public Service Commission of Wisconsin  
610 North Whitney Way, 2<sup>nd</sup> Floor  
Madison, Wisconsin 53705

Dear Sir/Madam:

Mr. Ben Kollenbroich, the Deputy Clerk and Administrative & Land Use Coordinator for the Town of Dunn has informed us of the possibility of the Town of Dunn procuring a grant from the State of Wisconsin to initiate and improve internet service for rural area residents. This is wonderful news. We hope this may come into fruition. Broadband internet access will benefit many people in our community.

Deer Park Buddhist Center, Inc. is a non-profit corporation incorporated in the State of Wisconsin that operates a Buddhist monastery located in the Town of Dunn. Currently six monks reside at the monastery on a permanent basis. While our monks live in accordance to the strict Buddhist religious vows and precepts established by Buddha 2,600 years ago, our monks have on going responsibilities that frequently require extensive communication both domestically and internationally.

Our center provides an established program of spiritual teachings and services to the monastic and lay community from around the greater Madison, Wisconsin area and far beyond. Throughout the year Deer Park attracts and hosts visits from schools throughout the State of Wisconsin as well as from neighboring states. Teachers and their students ranging from grade school levels all the way through college regularly schedule school field trips to Deer Park especially in connection with world religion classes. Additionally, various church groups from different traditions visit Deer Park frequently. Recently, we have also been asked to provide tours of our monastery to nursing home residents. Deer Park Buddhist Centre encourages and hosts interfaith and spiritual gatherings among people of different faiths and backgrounds.

Buddhist teachings and services are offered to the public free of any charge twice every week throughout the year. Each summer, Deer Park offers intensive summer programs that provide college and post graduate level courses on Buddhist philosophical topics that attract students from around the world.

Since we are located on Schneider Drive, surrounded by corn fields and far from any main town centers, our telephone line is our only means of obtaining internet service. It is our understanding that these lines are copper wires similar to the original lines that were first laid down for residents of Schneider Drive long before the internet was made available for use by the general public. When we have events open to the public and courses going on, we experience extremely slow and limited internet service. Indeed, it is not uncommon for the service to become so slow that it is essentially unavailable while classes are in session due to overtaxing the limited band width provided by the telephone lines. This is especially due to the increased use of multiple mobile devices, tablets and computers being used through the phone line at these times. Students go on line to do their research and studies while the courses are in progress, and unfortunately the existing telephone wires are unable to accommodate such a large volume of users due to very limited bandwidth. For example, during a typical four week summer school intensive program of studies, we usually have from 60 to 80 students attending classes five days per week from 10am to 4pm. We customarily offer two summer intensive courses consisting of a four week course offered during the month of July and a two week course offered during the first half of August. Course registrations, study materials and class schedules are all provided to the students via the internet. In addition, during summer courses we frequently have additional five to seven visiting monks and translators temporarily residing at the monastery in addition to our six resident monks who live at the monastery on a permanent basis. During such times access to the telephone internet service is severely limited for the duration of the summer course.

His Holiness the Dalai Lama has visited Deer Park Buddhist Center ten times since Deer Park Buddhist Center established the monastery in the Town of Dunn in 1981. When His Holiness visits Deer Park Buddhist Center, he is accompanied by his own entourage as well as officials from the U.S. State Department. During visits by His Holiness stable and reliable high speed internet service is essential to provide for the communication needs of his entourage.

We have previously raised these concerns with our phone provider. The telephone company informed us that the company is well aware of these issues; however, the company is not willing to invest in these much needed upgrades for residents in rural communities due to the limited number of potential subscribers for high speed broadband internet access.

One the one hand it is essential for a monastery to be located in a quiet setting away from centers of commerce in order to provide a lifestyle for our monks that fosters contemplation and meditation. On the other hand, due to the needs of the monastery to serve the broader community, access to high speed internet service is also an essential need.

## Deer Park Buddhist Center

We are indeed grateful to the Public Service Commission of Wisconsin and the Town of Dunn for trying to find a possible solution. We understand that our neighbors in the Town of Dunn and surrounding rural communities in Wisconsin are experiencing similar situations. We hope that the Town of Dunn is successful in obtaining this grant. Funding for broadband access in rural communities is an essential need, and will enable the State to make greater progress in improving modern communication for all rural residents.

We appreciate your assistance and consideration on this matter.

Sincerely yours,

To the Wisconsin State Public Service Commission,

This letter is in support of the Town of Dunn's application to the Wisconsin State Public Service Commission for funding to bring broadband internet service to the township.

We have been residents of the Town of Dunn for 15 years, and during that time we have been unable to get anything resembling high speed internet. We currently have the only real option, which is wireless broadband through Litewire Communications. I have kept detailed statistics of our speeds for the past ten years and at best, we get a 2.0 Mb download connection. During peak times, it is usually under 1 Mb download and many times completely unusable.

We have an adult child living at home who is enrolled in the UW-Whitewater online degree program, which requires a high speed connection. Most days she has to go to the local library to get usable service, even though we are paying nearly \$70/mo. for our wireless broadband.

Another child is enrolled in an online charter high school, which also requires broadband. She is required to have weekly Skype sessions, which are oftentimes impossible because of our service.

In 2013, I was let go from an "At Home Tech Support" job with Apple, Inc. because our home internet service did not meet their minimum requirements.

Finally, since 1998 I have operated a website design service from my home. Most times I am unable to use my home internet service for large uploads.

As you can see, our children's education and my professional employment have all suffered without broadband internet. Please consider the Town of Dunn's request for funding to bring high speed internet to our township.

Thank you,  
Patrick J Weeden  
Tracey A Nelson

6/26/2017

To whom it may concern,

I have been informed that the Town of Dunn is currently applying to receive grant funds for rural broadband internet services. I strongly support these efforts as it has significantly impacted our lives. We were not aware when building our house that internet would not be available and it has been very challenging and inconvenient.

We currently live at 3637 Skytop Rd. in the Town of Dunn and we do not have an internet service or phone service available at our house except for the internet on our cell phones. The only service possible to us is through a satellite provider which is very costly and it significantly limits usage. We had a local internet provider called Litewire attempt to provide us service through their small satellites but could not get adequate signal either. Not having a broadband internet service at our house has impacted our lives in many ways.

We operate a construction business out of our house and not being able to have reliable internet can be very challenging due to the slow speeds of downloading construction plans and large file documents. We currently have to travel to a place with strong internet to make downloads which is very inconvenient and costly.

Our children are also starting school and their education today depends on accessing and utilizing the resources on the web. Their need to have quality internet is growing significantly every year to complete assignments and further their development.

I also travel for work quite often during the weeks and in the past we have always had a security system install at our residence in other towns but since in Dunn we have not been able to get internet service at our new residence we currently do not have a system installed. It would make our entire family feel much more comfortable if we were able have one installed.

In addition, we need the internet to access our health care, insurance and community information as well as connect with family and friends. Living in the country, it is more convenient to purchase goods online and have them delivered but challenging to do now from a cell phone.

Regards,

Travis Meyers  
[Tmeyers@rue-inc.com](mailto:Tmeyers@rue-inc.com)  
608-280-1703

Hi Ben!

I wanted to send you some info on our house, too!

We live at 2714 County Road AB (Corner of Peterson Road and County Road B). We also experience very poor internet speeds. In fact, **with a speed test we get 1.3mb download and 384kbps (1/3 of a mb) upload**. The latency on that is also really high which doesn't help.

I know when I had contacted Frontier about this, they said it was because the "wires" loop around town and this area is one of the "last stops" so to speak. It's just frustrating because with slow speeds like this, it's hard to be able to provide for the needs of our children who need the internet for their education - and it's hard for me to work from home. I own a digital marketing company on the West Side of Madison and I'd love to be able to work from home, but unfortunately it's not even a remote possibility with the internet speeds the way they are. What's even more frustrating is that the capabilities for higher speed internet run right along County Road AB. For example, Windstream has a Fiber Internet line that runs there, but it's "not for residential access". Charter is about 1/4 of a mile away, but without funds to build to this area - they also aren't able to do anything. Wireless hotspots are unreliable and don't get high speed either... so getting high speed internet in our area is so important. Honestly, it's also a safety issue. Many security systems and health monitoring systems are all transmitted online and without reliable and fast access, it's not possible.

By the way...just to give you an idea of how slow it is... Gmail doesn't load at my house. It says my "connection is too slow". :-\

Anything you can do to help get some funds to this area through the grant would be awesome. :-)  
)

Thanks!

Nick Ring

RE: Grant for Town of Dunn

To Whom It May Concern,

Today's business connections are mainly through internet connection. Our business is concrete construction which involves sending estimates and invoices, as well as attached architectural plans and photos. We want to be able to respond quickly and not cause delays and questions about how up to date our business capabilities are by not being able to handle data in a reasonable manner. You can have the latest in computer equipment but if the broadband is too slow or unreliable, then it all is too slow. We believe that a broad band in the Town of Dunn would increase the value of our business.

But also on a personal level, checking your insurance, healthcare charts and communicating with health professionals, financial matters, markets and ordering online and just communicating with family and friends, would be much easier and reliable with broadband.

I hope that you will consider the benefits to our area when deciding who should receive this broadband grant.

Sincerely,

Carol Torgeson

Torgeson Concrete LLC

RE: Internet Service in the Town of Dunn

Dear Service Commission,

We have lived in the town of Dunn since moving into our new home in November of 1987. My point is we are long-time residents of the area and have always cherished the rural character and charm of the township. The Land Use Plan that frames the stewardship process over the land has been very effective in limiting urban sprawl into a unique and picturesque environment and serves as a model for other communities across the country. It is no coincidence that we are literally 10 minutes from downtown Madison but enjoy and share the peace and tranquility of this very special natural setting.

We have however struggled with the lack of connectivity associated with the digital age. We manage a business from our home that consists of offering intellectual property through license agreements involving patented products. This requires timely and consistent communications with technical and legal documents on a regular basis. After several experiences with various service providers we have found our best solution is to use the hotspot capability of our cell phones. Although better than other providers, the service is still woefully short of our needs. This is particularly troublesome when we exceed our allotted usage as our current provider slows the speed to less than a crawl.

It is difficult to do most of the activities that are associated with a robust and competitive service provider. Access and connectivity disruptions hinder even the most basic services that are available through the internet.

We respectfully request the Commission give serious consideration to assisting the Town through a "Grant" or other means to provide its residents with a viable solution to this dilemma.

Sincerely,

Mike McLain  
3717 Rivercrest Road  
McFarland, WI 53558

## Ben Kollenbroich

**From:** Hopeful Farm Sport Horses <hopefulfarm@gmail.com>  
**Sent:** Monday, June 26, 2017 2:47 PM  
**To:** Ben Kollenbroich  
**Subject:** Letter to PSC - broadband in the Town of Dunn.

Public Service Commission  
To Whom it May Concern,

I am writing to you today as a resident of the Town of Dunn. I have lived here for 15 years, having moved from the city of Madison in 2002.

In the 15 years I have lived in the Town of Dunn, technology has advanced through leaps and bounds. When I moved from Madison, everyone was on a dial up connection. To have a 56K modem in 2002 was the most advance technology.

Now 15 years later, there are a variety of high speed options available to most, including DSL, T1, LTE, and even Fiber Optic.

However, living in the rural Township, we have none of these options. Cable TV doesn't service my home. The fiber that has been run has been buried has not been offered to provide internet. There is no DSL, and no T1 connections. Our "land" telephone service infrastructure is in such a bad state of disrepair that we have not had a land connection in about 5 or more years. At best it was only capable of supporting about a 48k dial up connection when we moved here in 2002.

Our only options are to pay the ridiculous rates that the cellular companies charge, easily \$15 per gigabyte, OR pay for satellite "high speed" internet. We opted for the satellite internet. It's awful on a good day. The speed is slow, often below cellular 2G speeds. It is also weather-dependent, on a cloudy or rainy day it often does not work reliably.

Having terrible to no internet has caused a hardship on my family. We cannot work from home. It's difficult to shop or sell items online. I cannot do online banking, or even access my health records online.

I have a few wireless cameras for security as I live on a farm, and we have been robbed, but we find that it does us no good because we cannot broadcast it beyond the house as the poor internet service just does not support this.

I have to go into a nearby town and connect to a coffee shop wifi to do anything more than attempting to download email. Sometimes downloading email is difficult, especially if the email has any sort of attached files.

We cannot afford to pay the absorbent fees that the cellular companies charge for LTE data. At \$15 per gigabyte, and using 25-30 gigabytes of data monthly, the \$350 - 500 it would cost me is too much of a financial burden to bear for my family. And the reception from their towers is often not good as we live between the towers, and are at their farthest reaches for service.

It is incredibly frustrating in 2017 to have SUCH poor internet, living just 20 minutes from the state Capital. There are no financially feasible options. We are too far from the nearest city for DSL or even cable TV coverage. The phone company, Frontier, will not replace their aging infrastructure.

I can see the state capital building in Madison from my home, but my internet connection is no better than it was in 2002.

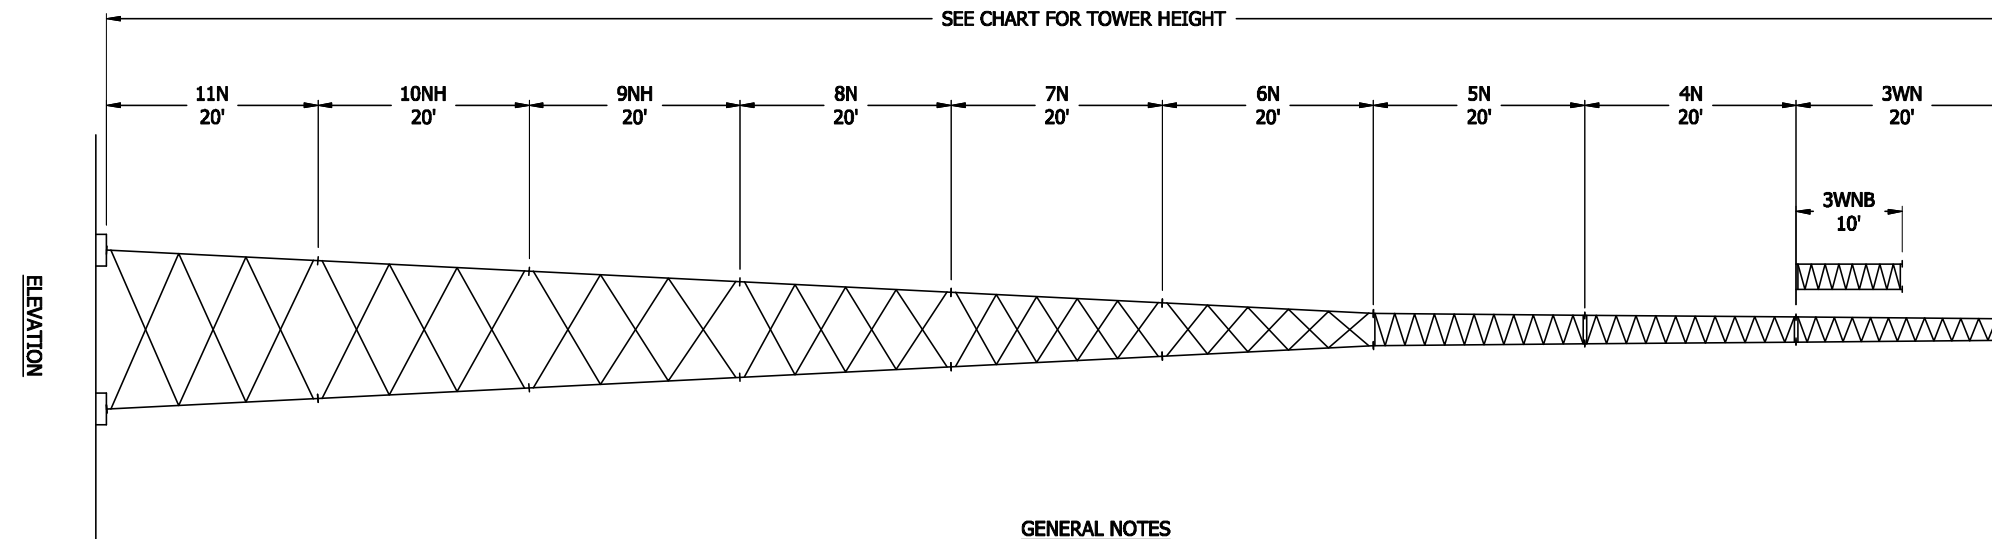

Please consider supporting the Town of Dunn in improving the connectivity for it's residence. I would be VERY grateful.

Best Wishes,

Stephanie Severn  
4595 Mahoney Road  
McFarland WI 53558 (Town of Dunn)

DATE: 01/30/14				

SEE DRAWING B090548 FOR GENERAL FOUNDATION NOTES & DRAWING B050439 FOR ANCHOR BOLT LAYOUT

PO BOX 5999  
PEORIA, IL 61601-5999  
TOLL FREE 800-727-ROHN

THIS DRAWING IS THE PROPERTY OF ROHN. IT IS NOT TO BE REPRODUCED, COPIED OR TRACED IN WHOLE OR IN PART WITHOUT OUR WRITTEN CONSENT.

**SELF-SUPPORTING TOWER STANDARD FOUNDATIONS ANSI/TIA-222-G**

DWN: CEJ	CHK'D: SM	DATE: 01/24/13
ENG'R: HA	SHEET #:	
PRJ. ENG'R:	PRJ. MANG'R:	
DRAWING NO: DWG-0693	REV: 2	

**STANDARD FOUNDATION NOTES  
ANSI/TIA-222-G**

1. STANDARD FOUNDATION DESIGNS ARE IN ACCORDANCE WITH ANSI/TIA-222-G, "STRUCTURAL STANDARDS FOR STEEL ANTENNA TOWERS AND ANTENNA SUPPORTING STRUCTURES", SECTION 9 AND ANNEX F FOR THE FOLLOWING PRESUMPTIVE CLAY SOIL PARAMETERS:

N (blows/ft) [blows/m]	Φ (deg)	Y (lb/ft <sup>3</sup> ) [kN/m <sup>3</sup> ]	C (psf) [kPa]	Ultimate Bearing (psf) [kPa]		Ultimate Skin Friction (psf) [kPa]	k (pci) [kN/m <sup>3</sup> ]	ε <sub>50</sub>
				Shallow Fnds.	Deep Fnds.			
8 [26]	0	110 [17]	1000 [48]	5000 [240]	9000 [431]	500 [24]	150 [41,000]	0.01

2. THE PURCHASER MUST VERIFY THAT ACTUAL SITE SOIL PARAMETERS MEET OR EXCEED ANSI/TIA-222-G PRESUMPTIVE CLAY SOIL DESIGN PARAMETERS AND THAT THE PENETRATION AND/OR ZONE OF SEASONAL MOISTURE VARIATION AT THE SITE. FOUNDATION DESIGN MODIFICATIONS MAY BE REQUIRED IN THE EVENT PRESUMPTIVE CLAY SOIL PARAMETERS ARE NOT APPLICABLE FOR THE ACTUAL SUBSURFACE CONDITIONS ENCOUNTERED.
3. A SITE-SPECIFIC INVESTIGATION IS REQUIRED FOR CLASS III STRUCTURES IN ACCORDANCE WITH ANSI/TIA-222-G.
4. FOUNDATION DESIGNS ASSUME FIELD INSPECTIONS WILL BE PERFORMED BY THE PURCHASER'S REPRESENTATIVE TO VERIFY THAT CONSTRUCTION MATERIALS, INSTALLATION METHODS AND ASSUMED DESIGN PARAMETERS ARE ACCEPTABLE BASED ON THE CONDITIONS EXISTING AT THE SITE.
5. WORK SHALL BE IN ACCORDANCE WITH LOCAL CODES, SAFETY REGULATIONS AND UNLESS OTHERWISE NOTED, THE LATEST REVISION OF ACI 318, "BUILDING CODE REQUIREMENTS FOR REINFORCED CONCRETE". PROCEDURES FOR THE PROTECTION OF EXCAVATIONS, EXISTING CONSTRUCTION AND UTILITIES SHALL BE ESTABLISHED PRIOR TO FOUNDATION INSTALLATION.
6. CONCRETE MATERIALS SHALL CONFORM TO THE APPROPRIATE STATE REQUIREMENTS FOR EXPOSED STRUCTURAL CONCRETE.
7. PROPORTIONS OF CONCRETE MATERIALS SHALL BE SUITABLE FOR THE INSTALLATION METHOD UTILIZED AND SHALL RESULT IN DURABLE CONCRETE FOR RESISTANCE TO LOCAL ANTICIPATED AGGRESSIVE ACTIONS. THE DURABILITY REQUIREMENT OF ACI 318 CHAPTER 4 SHALL BE SATISFIED BASED ON THE CONDITIONS EXPECTED AT THE SITE. AS A MINIMUM, CONCRETE SHALL DEVELOP A MINIMUM COMPRESSIVE STRENGTH OF 4500 PSI (31.0 MPa) IN 28 DAYS.
8. MAXIMUM SIZE OF AGGREGATE SHALL NOT EXCEED SIZE SUITABLE FOR INSTALLATION METHOD UTILIZED OR 1/3 CLEAR DISTANCE BEHIND OR BETWEEN REINFORCING. MAXIMUM SIZE MAY BE INCREASED TO 2/3 CLEAR DISTANCE PROVIDED WORKABILITY AND METHODS OF CONSOLIDATION SUCH AS VIBRATING WILL PREVENT HONEYCOMBS OR VOIDS.
9. REINFORCEMENT SHALL BE DEFORMED AND CONFORM TO THE REQUIREMENTS OF ASTM A615 GRADE 60 UNLESS OTHERWISE NOTED. SPLICES IN REINFORCEMENT SHALL NOT BE ALLOWED UNLESS OTHERWISE INDICATED.
10. REINFORCING CAGES SHALL BE BRACED TO RETAIN PROPER DIMENSIONS DURING HANDLING, THROUGHOUT PLACEMENT OF CONCRETE AND DURING EXTRACTION OF TEMPORARY CASING.
11. WELDING IS PROHIBITED ON REINFORCING STEEL AND EMBEDMENTS.

12. MINIMUM CONCRETE COVER FOR REINFORCEMENT SHALL BE 3 INCHES (76 mm) UNLESS OTHERWISE NOTED. APPROVED SPACERS SHALL BE USED TO INSURE A 3 INCH (76 mm) MINIMUM COVER ON REINFORCEMENT. CONCRETE COVER FROM TOP OF FOUNDATION TO ENDS OF VERTICAL REINFORCEMENT SHALL NOT EXCEED 3 INCHES (76 mm) NOR BE LESS THAN 2 INCHES (51 mm).
13. SPACERS SHALL BE ATTACHED INTERMITTENTLY THROUGHOUT THE ENTIRE LENGTH OF VERTICAL REINFORCING CAGES TO INSURE CONCENTRIC PLACEMENT OF CAGES IN EXCAVATIONS.
14. FOUNDATION DESIGNS ASSUME STRUCTURAL BACKFILL TO BE COMPACTED IN 8 INCH (200 mm) MAXIMUM LAYERS TO 95% OF MAXIMUM DRY DENSITY AT OPTIMUM MOISTURE CONTENT IN ACCORDANCE WITH ASTM D698. ADDITIONALLY, STRUCTURAL BACKFILL MUST HAVE A MINIMUM COMPACTED UNIT WEIGHT OF 100 POUNDS PER CUBIC FOOT (16 kN/m<sup>3</sup>).
15. FOUNDATION DESIGNS ASSUME LEVEL GRADE AT THE SITE.
16. FOUNDATION INSTALLATION SHALL BE SUPERVISED BY PERSONNEL KNOWLEDGEABLE AND EXPERIENCED WITH THE PROPOSED FOUNDATION TYPE. CONSTRUCTION SHALL BE IN ACCORDANCE WITH GENERALLY ACCEPTED INSTALLATION PRACTICES.
17. FOR FOUNDATION AND ANCHOR TOLERANCES SEE DRAWING A810214.
18. LOOSE MATERIAL SHALL BE REMOVED FROM BOTTOM OF EXCAVATION PRIOR TO CONCRETE PLACEMENT. SIDES OF EXCAVATION SHALL BE ROUGH AND FREE OF LOOSE CUTTINGS.
19. CONCRETE SHALL BE PLACED IN A MANNER THAT WILL PREVENT SEGREGATION OF CONCRETE MATERIALS, INFILTRATION OF WATER OR SOIL AND OTHER OCCURRENCES WHICH MAY DECREASE THE STRENGTH OR DURABILITY OF THE FOUNDATION.
20. FREE FALL CONCRETE MAY BE USED PROVIDED FALL IS VERTICAL DOWN WITHOUT HITTING SIDES OF EXCAVATION, FORMWORK, REINFORCING BARS, FORM TIES, CAGE BRACING OR OTHER OBSTRUCTIONS. UNDER NO CIRCUMSTANCES SHALL CONCRETE FALL THROUGH WATER.
21. CONCRETE SHALL BE PLACED AGAINST UNDISTURBED SOIL EXCEPT FOR PIERS OR PIER AND PAD FOUNDATIONS. FORMS FOR PIERS SHALL BE REMOVED PRIOR TO PLACING STRUCTURAL BACKFILL.
22. CONSTRUCTION JOINTS, IF REQUIRED IN PIER MUST BE AT LEAST 12 INCHES (305 mm) BELOW BOTTOM OF EMBEDMENTS AND MUST BE INTENTIONALLY ROUGHENED TO A FULL AMPLITUDE OF 1/4 INCH (6 mm). FOUNDATION DESIGN ASSUMES NO OTHER CONSTRUCTION JOINTS.
23. CASING, IF USED, SHALL NOT BE LEFT IN PLACE. EQUIPMENT, PROCEDURES, AND PROPORTIONS OF CONCRETE MATERIALS SHALL INSURE CONCRETE WILL NOT BE ADVERSELY DISTURBED UPON CASING REMOVAL. DRILLING FLUID, IF USED, SHALL BE FULLY DISPLACED BY CONCRETE AND SHALL NOT BE DETRIMENTAL TO CONCRETE OR SURROUNDING SOIL. CONTAMINATED CONCRETE SHALL BE REMOVED FROM TOP OF FOUNDATION AND REPLACED WITH FRESH CONCRETE.
24. TOP OF FOUNDATION SHALL BE SLOPED TO DRAIN WITH A FLOATED FINISHED. EXPOSED EDGES OF CONCRETE SHALL BE CHAMFERED 3/4" X 3/4" (19 mm X 19 mm) MINIMUM.
25. FOR ANCHOR BLOCK TYPE FOUNDATIONS, FOR GUYED TOWERS, ADDITIONAL CORROSION PROTECTION MAY BE REQUIRED FOR STEEL GUY ANCHORS IN DIRECT CONTACT WITH SOIL. DESIGN ASSUMES PERIODIC INSPECTIONS WILL BE PERFORMED OVER THE LIFE OF THE STRUCTURE TO DETERMINE IF ADDITIONAL ANCHOR CORROSION PROTECTION MEASURES MUST BE IMPLEMENTED BASED ON OBSERVED SITE-SPECIFIC CONDITIONS.

**FOUNDATION AND ANCHOR TOLERANCES**  
**ALL FOUNDATIONS**

1. CONCRETE DIMENSIONS - PLUS OR MINUS 1" (25mm).
2. DEPTH OF FOUNDATION - PLUS 3" (76mm) OR MINUS 0".
3. DRILLED FOUNDATIONS OUT OF PLUMB - 1.0 DEGREE.
4. REINFORCING STEEL PLACEMENT - PER A.C.I. 301.
5. PROJECTION OF EMBEDMENTS - PLUS OR MINUS 1/8" (3mm).
6. VERTICAL EMBEDMENTS OUT OF PLUMB - 0.5 DEGREE.

**ANCHOR BOLTS**

7. MAXIMUM DISTANCE FROM CENTERLINE OF ANCHOR BOLTS TO CENTERLINE OF FOUNDATION - 1/24 OF PIER DIAMETER UP TO A MAXIMUM OF 2" (51mm).
8. ANCHOR BOLT SPACING - 1/16" (2mm).
9. ANCHOR BOLT CIRCLE ORIENTATION - 0.25 DEGREE.
10. ANCHOR BOLT CIRCLE DIAMETER - PLUS OR MINUS 1/16" (2mm).

**SELF-SUPPORTING TOWERS**

11. FACE SPREAD DIMENSION CENTER TO CENTER OF ANCHOR BOLT CIRCLES - PLUS OR MINUS 1/16" (2mm) OR 1/16" (2mm) PER 20 FT. (6m) OF FACE SPREAD.
12. MAXIMUM DIFFERENCE BETWEEN ANY TWO FOUNDATION ELEVATIONS - 1/2" (13mm).

**GUYED TOWERS**

13. GUY RADIUS - PLUS OR MINUS 5% OF DISTANCE SPECIFIED.
14. ANCHOR ELEVATION - PLUS OR MINUS 5% OF GUY RADIUS.
15. ANCHOR ALIGNMENT (PERPENDICULAR TO GUY RADIUS) - 1.0 DEGREE.
16. ANCHOR ROD SLOPE - PLUS OR MINUS 1.0 DEGREE.
17. ANCHOR ROD ALIGNMENT WITH GUY RADIUS PLUS OR MINUS 1.0 DEGREE.
18. ANCHOR HEAD OUT OF PLUMB - 1.0 DEGREE.
19. GUY INITIAL TENSION - PLUS OR MINUS 10% OF TENSION SPECIFIED.

NOTE: TOLERANCES IN NOTES 13 AND 14 CAN NOT OCCUR SIMULTANEOUSLY

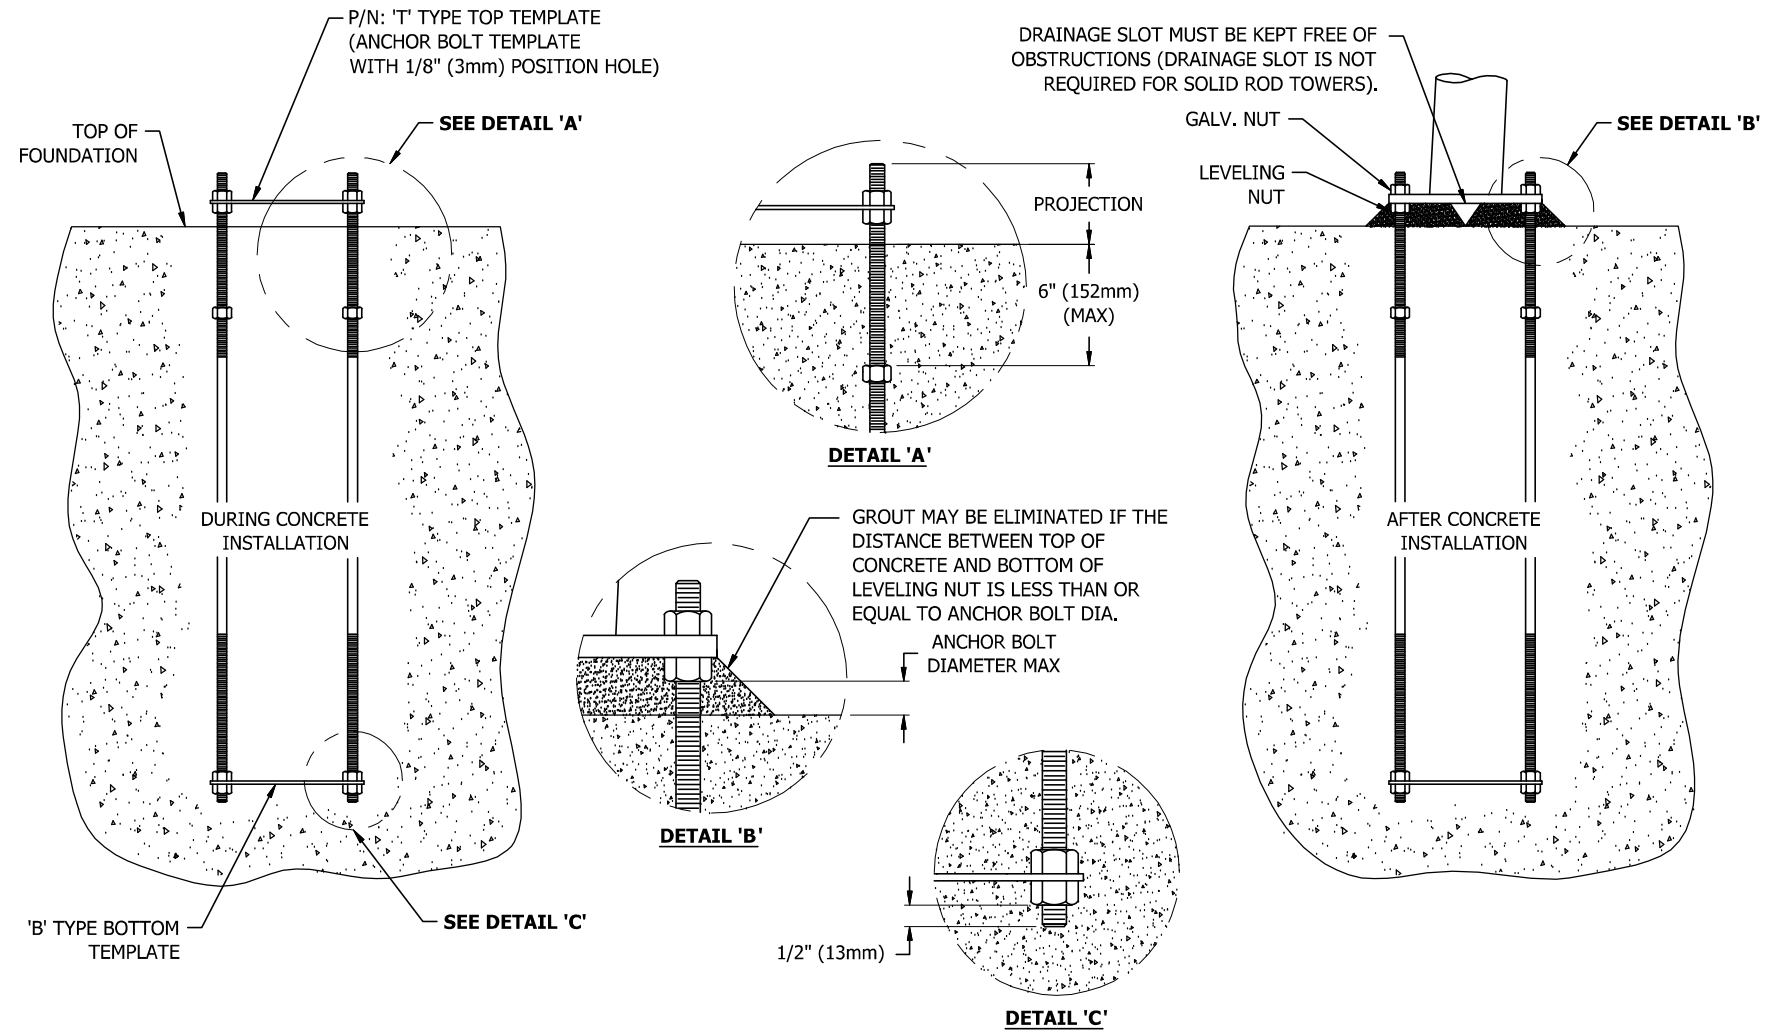

**WARNING!!!**

AFTER ANCHOR BOLTS ARE INSTALLED IN CONCRETE HAS TAKEN ITS INITIAL SET, ANCHOR BOLTS MUST NOT BE MOVED, BENT OR REALIGNED IN ANY MANNER. A NUT LOCKING DEVICE MUST BE INSTALLED ON ALL ANCHOR BOLTS.

**ANCHOR BOLT INSTALLATION TOLERANCES**

1. FACE SPREAD DIMENSION CENTER-TO-CENTER OF ANCHOR BOLT CIRCLES - PLUS OR MINUS 1/16" (2mm) OR 1/16"(2mm) PER 20 FT. (6m) OF FACE SPREAD.
2. MAXIMUM DIFFERENCE BETWEEN ANY TWO FOUNDATION ELEVATIONS - 1/2" (13mm).
3. CONCRETE DIMENSIONS - PLUS OR MINUS 1" (25mm).
4. DEPTH OF FOUNDATION - PLUS 3" (76mm) OR MINUS 0".
5. DRILLED FOUNDATIONS OUT OF PLUMB - 1.0 DEGREE.
6. REINFORCING STEEL PLACEMENT - PER A.C.I. 301.
7. PROJECTION OF EMBEDMENTS - PLUS OR MINUS 1/8" (3mm).
8. VERTICAL EMBEDMENTS OUT OF PLUMB - 1/2 DEGREE.
9. MAXIMUM DISTANCE FROM CENTERLINE OF ANCHOR BOLTS TO CENTERLINE OF FOUNDATION - 1/24 OF PIER DIAMETER UP TO A MAXIMUM OF 2" (50mm).
10. ANCHOR BOLT SPACING - 1/16" (2mm).
11. ANCHOR BOLT CIRCLE ORIENTATION - 1/4 DEGREE.
12. ANCHOR BOLT CIRCLE DIAMETER - PLUS OR MINUS 1/16" (2mm).

**!!! WARNING !!!**

- AFTER ANCHOR BOLTS ARE INSTALLED AND CONCRETE HAS TAKEN ITS INITIAL SET, ANCHOR BOLTS MUST NOT BE MOVED, BENT OR REALIGNED IN ANY MANNER.

**ANCHOR BOLT TIGHTENING NOTES**

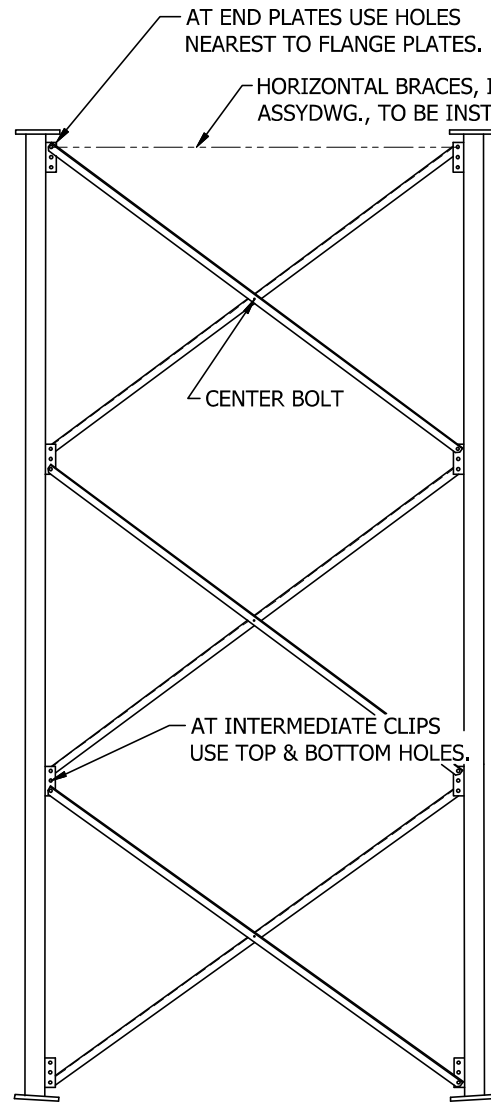

1. NUTS, THREADS AND ALL NUT CONTACT SURFACES MUST BE CLEANED AND LUBRICATED AFTER CONCRETE INSTALLATION AND IMMEDIATELY BEFORE INSTALLATION OF LEVELING AND TOP NUTS. NUTS MUST BE FREE TO MOVE THROUGHOUT THE ENTIRE LENGTH OF THE ANCHOR BOLT THREAD PROJECTION.
2. AFTER LEVELING THE LEVELING NUTS AND SETTING THE BASE PLATE, TOP NUTS MUST BE INSTALLED IN AN INCREMENTAL STAR TIGHTENING SEQUENCE TO A SNUG TIGHT CONDITION FOLLOWED BY TIGHTENING THE LEVELING NUTS IN A SIMILAR PATTERN TO A SNUG TIGHT CONDITION. SNUG TIGHT IS DEFINED BY THE TIGHTNESS OBTAINED WITH THE EFFORT OF ONE PERSON WITH A 12 INCH NOMINAL LENGTH WRENCH.
3. AFTER ALL TOP AND LEVELING NUTS ARE TIGHTENED TO A SNUG TIGHT CONDITION, TOP NUTS SHALL BE FURTHER TIGHTENED IN AN INCREMENTAL STAR PATTERN WITH THE LEVELING NUTS SECURED TO RESULT IN A 1/3 TOP NUT ROTATION FOR ANCHOR BOLTS 1-1/2 INCHES OR LESS IN DIAMETER, OR A 1/6 TOP NUT ROTATION FOR ANCHOR BOLTS GREATER THAN 1-1/2 INCHES IN DIAMETER.

**NOTES**

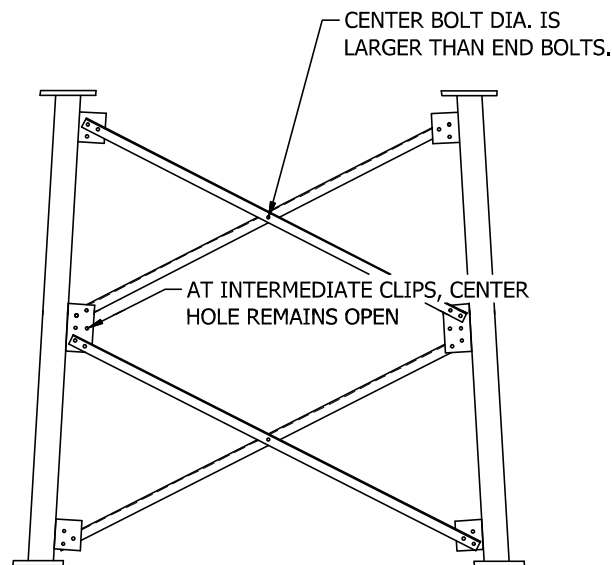

1. ALL ANCHOR BOLTS MUST MEET OR EXCEED REQUIREMENTS OF A.S.T.M. F1554-S2, S5 GRADE 105.
2. GROUT TO BE 5000 PSI MIN. ULTIMATE STRENGTH/7 DAY NON-SHRINKING AND NON-METALLIC.
3. SPECIAL CARE MUST BE TAKEN WHEN LIFTING ANCHOR BOLT CLUSTER, IN ORDER TO PREVENT ANCHOR BOLT TEMPLATE DISTORTION.
4. ANCHOR BOLT ASSEMBLY MUST BE ADEQUATELY SUPPORTED AND RESTRAINED TO PREVENT MOVEMENT OF THE CLUSTER DURING CONCRETE INSTALLATION.
5. IT IS THE RESPONSIBILITY OF THE FOUNDATION CONTRACTOR TO VERIFY THAT THE CORRECT ANCHOR BOLT TEMPLATE AND FOUNDATION SHOWN ON RESPECTIVE SITE DRAWINGS ARE BEING USED.
6. IT IS THE RESPONSIBILITY OF THE FOUNDATION DESIGN ENGINEER TO INSURE THAT THE ANCHORAGES PROVIDED ARE COMPATIBLE WITH THE PROPOSED FOUNDATION DESIGNS AND THAT THE CAPACITIES OF THE ANCHORAGES ARE NOT LIMITED BY THE STRENGTH OF THE FOUNDATIONS.

**!! WARNING !!**  
**PRIOR TO PLACING CONCRETE:**  
 • CHECK THAT THE TEMPLATE ANCHOR BOLT CIRCLE MATCHES THE ANCHOR BOLT CIRCLE SHOWN ON THE STRUCTURE DRAWING.  
 • CALL ROHN (309)-566-3000 FOR ANY DISCREPANCY.

- ASSEMBLY BOLT INSTALLATION**
1. UNLESS OTHERWISE SPECIFIED, ASSEMBLY BOLTS AND ANCHOR BOLTS ARE TO BE TIGHTENED TO A SNUG TIGHT CONDITION (MEMBERS IN FIRM CONTACT) AND MUST INCLUDE A NUT LOCKING DEVICE. NO MINIMUM BOLT TENSION OR TORQUE VALUES ARE REQUIRED. WHEN LOCK WASHERS ARE PROVIDED AS A NUT LOCKING DEVICE, REPLACE ANY DAMAGED WASHERS DUE TO OVER TIGHTENING.
  2. WASHERS ARE TO BE INSTALLED OVER SLOTTED HOLES.

- PAL NUT INSTALLATION**
1. PAL NUTS ARE TO BE INSTALLED AFTER NUTS ARE TIGHT AND WITH EDGE LIP OUT (SEE PICTURE). PAL NUTS ARE NOT REQUIRED WHEN SELF-LOCKING NUTS OR LOCK WASHERS ARE PROVIDED.

○

STEP BOLTS TO BE CLIMBED BY A COMPETENT CLIMBER ONLY. 100% FALL PROTECTION IS REQUIRED AT ALL TIMES. CLIMBING STEP BOLTS IS DANGEROUS AND CAN CAUSE SERIOUS INJURY OR DEATH. PERFORM AN INSPECTION PRIOR TO CLIMBING TO IDENTIFY POTENTIAL CLIMBING HAZARDS.

STEP BOLTS SPACING AT SECTION JOINTS MAY NOT BE CONSISTENT WITH THE SPACING THROUGHOUT THE STRUCTURE. FLANGE PLATES AT SECTION JOINTS, GUYS, ATTACHMENTS TO LEGS, ETC. MAY BE AN OBSTRUCTION TO CONTINUOUS CLIMBING.

**STEP BOLT CLIMBING WARNING SIGN**

(INSTALL WARNING SIGN IN BOTTOM 5' OF STRUCTURE)

**NOTE**

1. STEP BOLTS MUST BE TURNED UNTIL THE FRONT EDGE OF THE BOLT TOUCHES THE SIDE OF THE STRUCTURE.
2. STEP BOLTS ARE SUPPLIED FOR CONSTRUCTION PURPOSES AND ARE NOT INTENDED FOR USE BY UNQUALIFIED PERSONNEL.
3. DEVIATION FROM PERFECT ALIGNMENT IS ACCEPTABLE. SOME SPACING INCONSISTENCY MAY EXIST AT SPLICE LOCATIONS.
4. IF STEP BOLTS ARE BELIEVED TO PRESENT SAFETY PROBLEMS TO PERSONNEL, DO NOT INSTALL THE STEP BOLTS.
