
**Sworn Statement of Naveed Sherwani
in Support of New Tower Construction Pursuant to Wis. Stat. §66.0404**

State of Wisconsin)
) ss.
County of Dane)

NAVEED SHERWANI, being first duly sworn on oath, deposes and says that:

1. I am an adult resident of the State of Texas and serve as a Radio Frequency Engineer at DISH Wireless, LLC ("DISH").

2. My job duties at DISH include design and optimization of new and existing wireless facilities to meet DISH's network needs. I have ongoing oversight duties related to DISH's mobile service support structures in the State of Wisconsin, including the proposed mobile service support structure being proposed by DISH and Iron Mountain Towers, LLC dba TowerKing at 1576 Spring Road, Stoughton, Wisconsin which bears Parcel ID # 0511-0328-1000 (the "Proposed Communications Facility").

3. This sworn statement is made pursuant to Wis. Stat. §66.0404(2)(b)6.

4. DISH identified a genuine need for the Proposed Communications Facility, and thereafter, DISH's engineering department issued a "search ring" defining the precise geographic area where the Proposed Communications Facility was needed to address the identified need (the "Search Ring").

5. The Proposed Communications Facility is being proposed because collocation within the Search Ring is infeasible, as no existing structures of any kind are available for collocation.

6. Because no structures exist to support collocation within the Search Ring, we are requesting permission to construct the Proposed Communications Facility.

7. The minimum height needed for this site is One Hundred Ninety Five Feet (195') antenna centerline.

8. DISH evaluated two existing towers nearby from the Proposed Communications Facility and the findings are as follows:

- a. The SBA owned tower located at coordinates 42.9204, -89.1690 is not viable because using that tower would create too much overlap in coverage with the location as shown on the propagation maps to the Southeast (MWMKE00297), and would also create a gap in coverage to the West which would require an additional tower to provide adequate service to the Eastern side of Stoughton.
- b. The CST owned tower located at coordinates 42.962588, -89.179724 is not viable because using that tower would create too much overlap in coverage with the location as shown on the propagation maps to the North (MWMKE00296A), and would also create a gap in coverage to the Southwest which would require an additional tower to provide adequate service to the Eastern side of Stoughton and would likely create a drop in calls on Route 51 to the South.
