

To whom it may concern:

As this submission for a building permit is going to have quite a bit more scrutiny on it than a normal permit request. I want to provide the following reassurances.

1. Dettmann Vineyards is a private estate and will not be open to the public.
2. Dettmann Vineyards is and will continue to be my primary residence.
3. The proposed building will not be used for commercial activities. Only agricultural and residential activities.
4. The proposed building will not be rented for events
5. The proposed building will be used to support my farm, hobbies, and interests in a private manor
6. I will not be seeking out any conditional use permits
7. I want to be able to build my building, keep to myself, and be left alone.
8. I want to create a property that accentuates the beauty of the Cross Plains Agricultural area...a beautiful private vineyard does just that.

Sincerely,
Karl Dettmann

Permits from other regulatory agencies such as Dane County Land & Water Resources, Madison/Dane County Public Health, Dane County Highway Department, and/or State Department of Transportation may be needed **prior to a Zoning Permit being issued.**

Zoning permits are required for any new building over 120 square feet in size, or any modifications or expansion of existing structures. **A change of use permit is required** if you are changing the use of any existing building on the property (example: barn to residence).

Permits may be obtained at our office or by mailing all appropriate information and fees to Dane County Planning and Development, Zoning Division, City County Building, Rm 116, 210 Martin Luther King, Jr., Blvd., Madison, WI 53703-3342. Questions? Call (608) 266-4266.

Sample Elevation and Floor Plan

EXAMPLES

Building elevation drawings are exterior views of the building, sometimes identified as front, rear, left or right or North, South, East or West. Elevation drawings must be:

- Drawn using an architect's or engineer's scale (ie: 1/4 inch= 1 foot or 1 inch= 10 feet)
- Elevations show the level at which the ground (finished grade) meets the building, the overall height to peak, eave height, and/or roof pitches sufficient to calculate average height.

Floor plans are what you would see if you were to look straight down at the floor or basement with the roof or floors above removed. You will need to provide one floor plan for each level of the building on which work is being done. This plan must:

- Be drawn using an architect's or engineer's scale (ie: 1/4 inch= 1 foot or 1 inch= 10 feet)
- Have all rooms labeled.
- Provide exterior dimensions sufficient to calculate floor area (square feet) for each story and basement.

Sample Site Plan

- Indicate the scale of the plan (must be engineering scale ie: 1 inch= 10 feet) and North location.
- Show the dimensions and square footage of each of the following:
 - o Existing and proposed buildings.
 - o Addition(s) to dwelling or principal buildings.
 - o Accessory structures (ie: garage, storage, etc.).
 - o Additions(s) to accessory structure(s).
- Show the location, square footage and use of the new structure(s). For new buildings to be served by septic systems, show the location and dimensions of both the primary and alternate drainfield areas. For alterations or additions, if location is not known, show the location of the septic tank and vent pipe.
- Show location of all lot lines and their dimensions. Calculate the area of the site occupied by buildings (lot coverage) as a percentage of the total lot area.

Additional information may be required.

- You will need to hire a surveyor to prepare a location survey to verify the construction location.
- The survey shall be done at the time when foundations or basement walls are completed.
- A location survey shall be submitted to the zoning office before continuing work on the project.
