

I don't mind opposition or questions in regards to my operation, but what I do mind is quoting the wrong Dane County Ordinance number. Also, what I do not like, is a Supervisor from another Township assuming he knows my operation. I am entitled to a fair, impartial and unbiased inspection. In other words, no one other than the assigned inspector from the zoning department should be or will ever be a part of the inspection process. If he thinks, ever, that a town board member will become part of an inspection process, then he should be aware that not only will the inspection be questionable, my due process will be violated. I have more, but will leave it at that for now.

Thanks, Cindy
