!-----!

We are opposed to this proposal for many reasons as listed below. We live on Clemens Rd which is a mile as the crow flies from this proposed quarry on Bonetti Road.

1. The water quality will be compromised with many negative health effects. Our well is 400 feet deep and we already have nitrates in our water samples. We are concerned that this quarry will cause them to go higher.
2. The proposed high capacity well can pump out 100,000 gallons of water per day. How can the environment surrounding this quarry handle this?
3. Our roads are too narrow and unable to handle the traffic already on them.
4. A proposal of this magnitude should not be decided by a town board. It's an entire township that's affected besides possibly the entire Village of Dane and township of Lodi.
