

# OAK SAVANNA RESTORATION PROJECT

Protecting and restoring rare habitat and plant communities

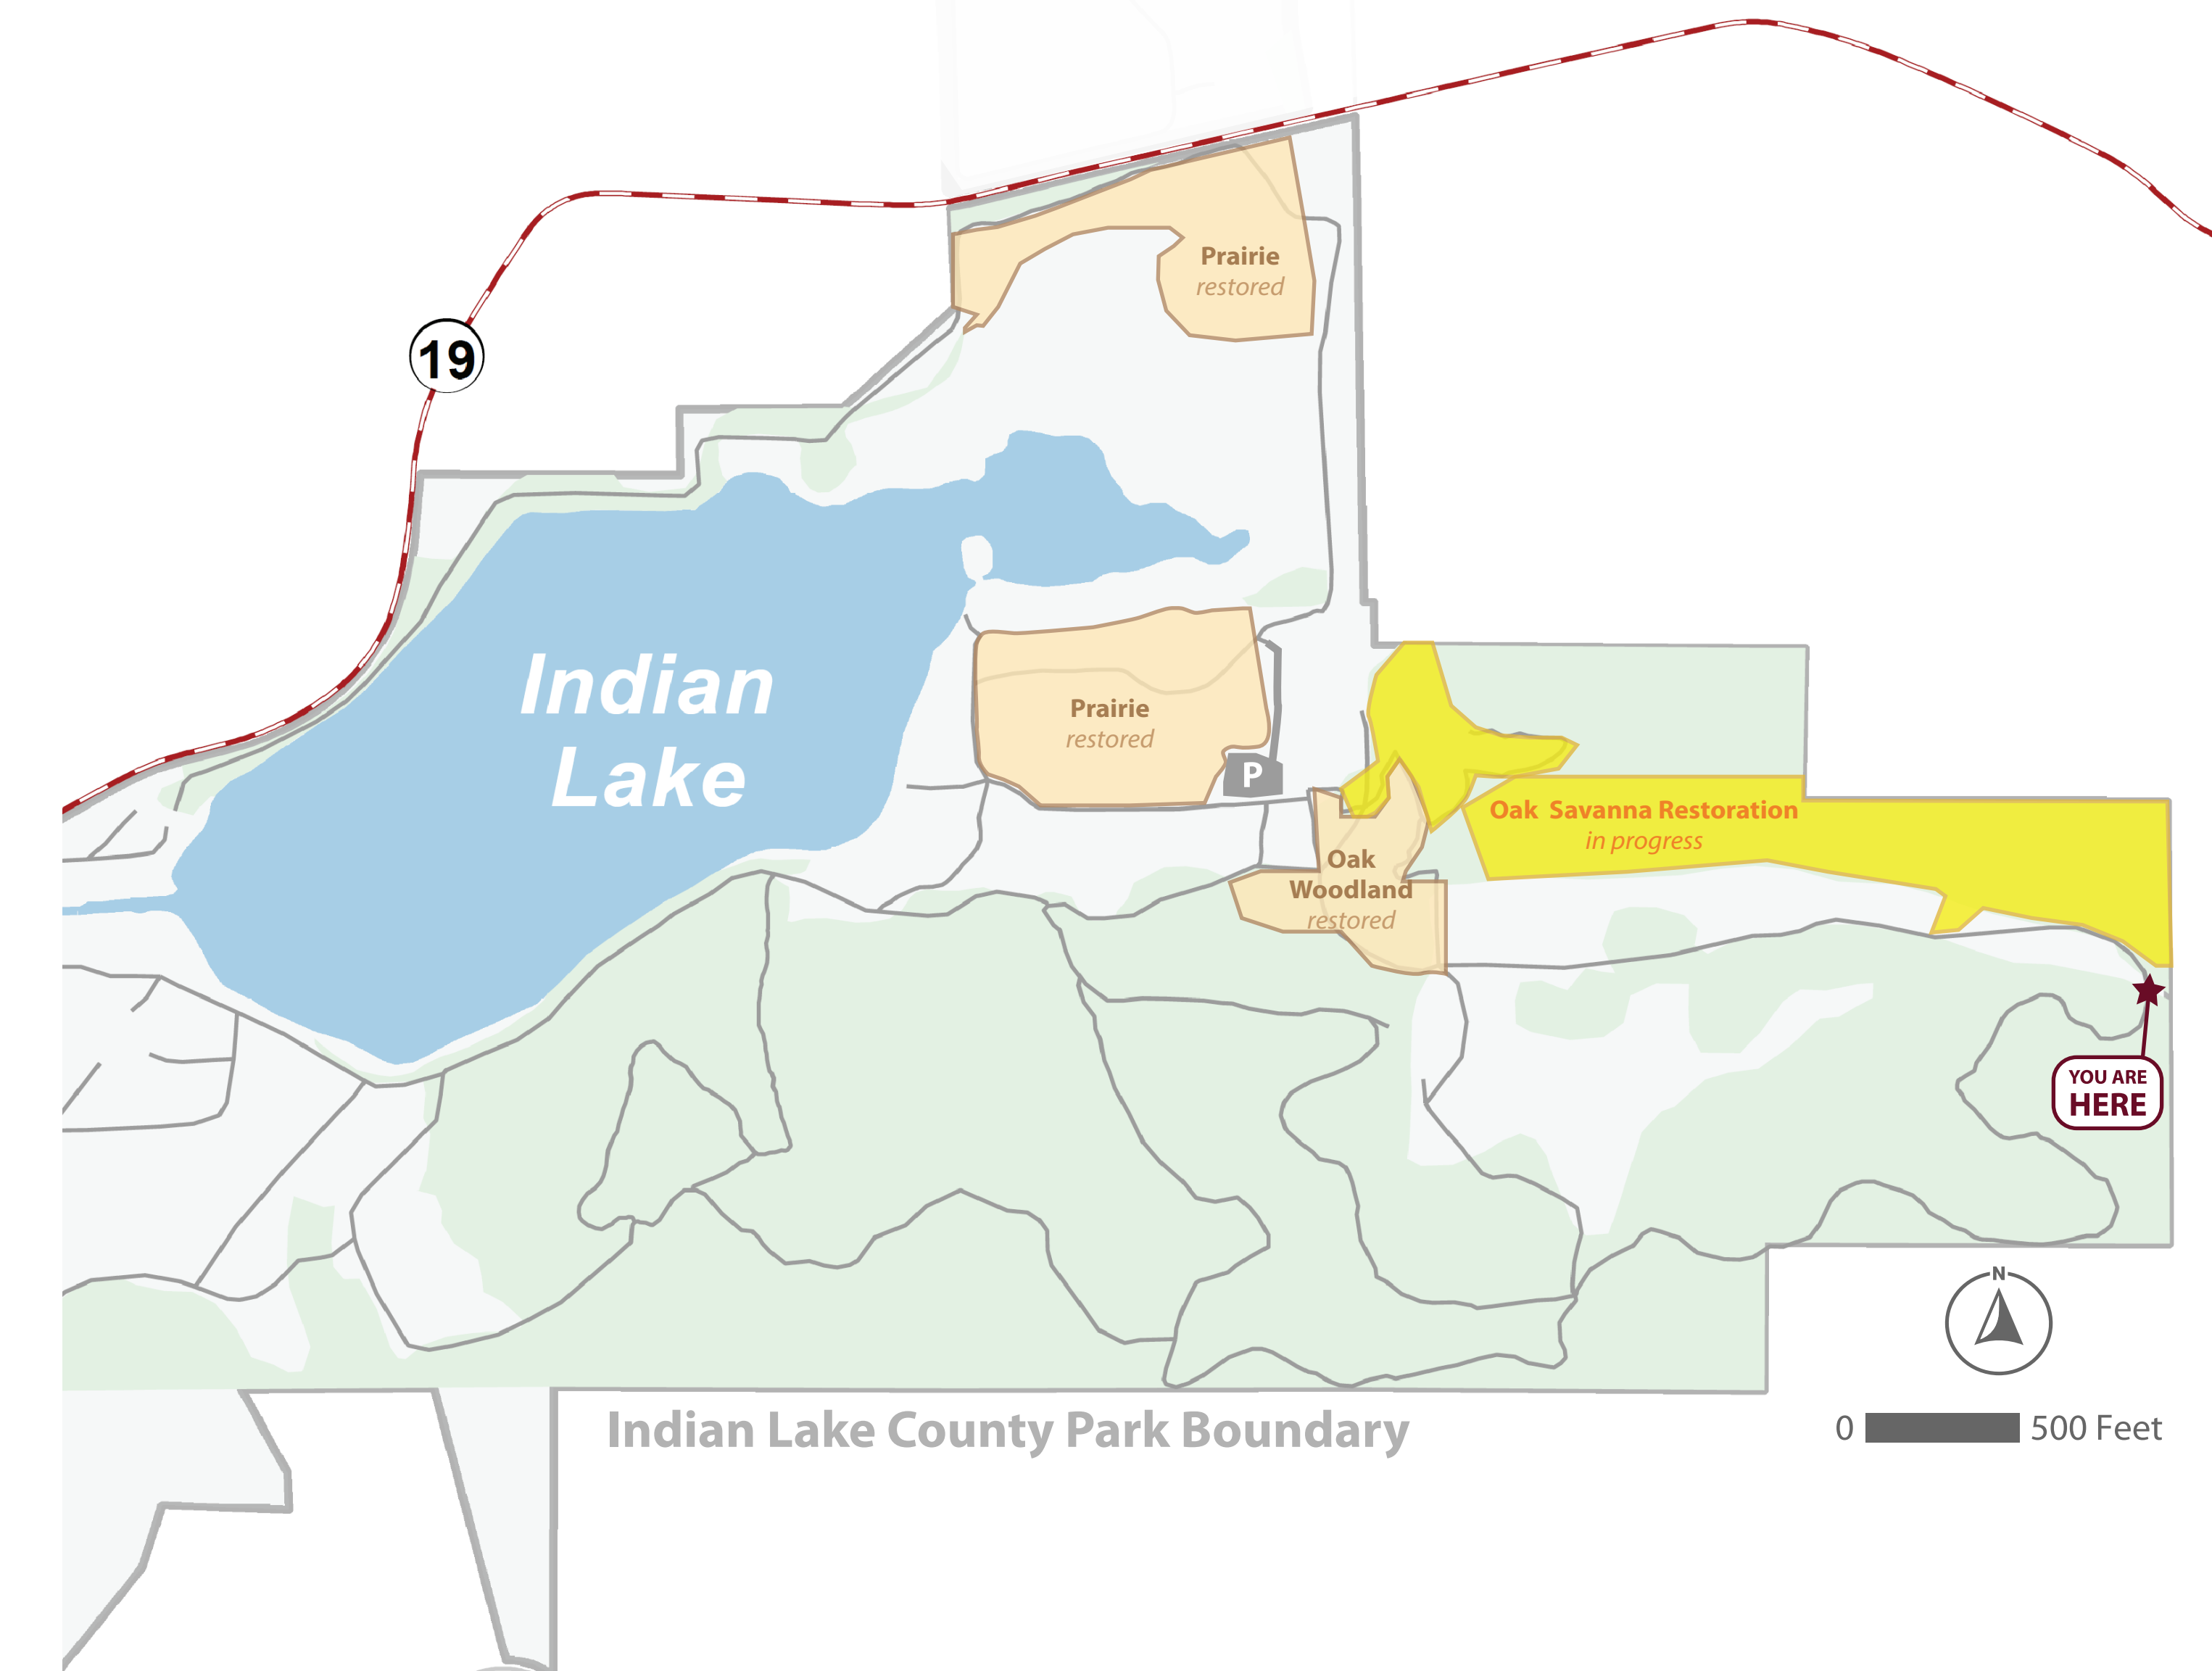

## Background:

Dane County Parks staff and the Friends of Indian Lake County Park have worked for several years at Indian Lake County Park to restore rare oak savanna habitat that once dominated the area. Now one of the rarest plant communities on earth, a project is currently underway to restore a large 17-acre section of this unique habitat.

## Restoration Goals:

- Restore land to pre-settlement oak savanna habitat.
- Remove invasive species to protect remnant prairie pockets with unique native plant diversity.
- Provide improved habitat for wildlife.

## Restoration Areas:

## For more information:

Dane County Parks  
(608) 224-3730
