

Invenergy

Koshkonong Solar Energy Center

The Koshkonong Solar Energy Center is a proposed 300 megawatt (MW) solar power generation facility in Dane County, Wisconsin, targeted to begin operating in 2024. Solar technology uses the power of the sun to deliver clean, renewable energy and is now one of the lowest-cost energy sources available.

Enough sustainable energy to power **60,000 American homes**

An estimated **\$140 million invested** in the Dane County economy over the life of the project

An estimated **300 construction jobs** supported during peak construction

Up to **5 full-time operations and maintenance jobs** created once operational

Emissions reductions equivalent to taking **65,000 cars off the road**

Supports local education, emergency & veteran services and environmental stewardship

Uses the most up-to-date, innovative technology

300 megawatts of sustainable energy

Development Timeline

2019–2022	2022-2024	2024
