

Highway CNG parking and maintenance—Round 2 SMART Fund revised proposal information

Lisa,

Here is the engineering consultant's report for implementing CNG at the Fish Hatchery location. As you can see on the last page of the report, the blue building is broken out as a separate cost of \$193,729. There is some additional cost for design and having the design consultant create a set of blueprints for bidding purposes. Based on that, I expect the total project to cost under \$210,000.

Thank you!
