Jerry,

My name is Brandon Arndt and I am a resident of the Marcie Drive neighborhood in Brooklyn, Wisconsin. Our backyards are adjacent to the Payne and Dolan quarry pit. This location is conveniently part of the Town of Oregon, and to its furthest south corner. There is a proposal to pass an asphalt plant at this location at the Dane county meeting on 12/22.

My neighbors and myself are greatly concerned that the new arrival of an asphalt plant will have detrimental effects to the health and well being of our neighborhood and the Village of Brooklyn.

At one time, Brooklyn was a lively little town, as I have heard from my parents and grandparents who have also spent their entire lives in this community. I see so much potential in this place but having an asphalt plant in close proximity might not allow for growth. This Marcie/Cedar/Pine neighborhood has had an increase in property value over the last few years. I am afraid of what a new "stinky" asphalt plant will have on home value and then resale. With the new plant will also come even more noise and air pollution. In my own research of asphalt plants, I have found there to be an increased risk of cancer due to its production.

Brooklyn elementary is a prized school within a great school district. The new plant will be within a mile of the school. The neighborhood next to the plant is home to dozens and dozens of school aged children and young families. I plead for you to give consideration to not only the future businesses in Brooklyn but also to the health of the people that live and play within such close proximity.

Help us keep this neighborhood filled with the laughter of playing children and the smells of backyard barbecue.

Thank you

--

Brandon Arndt RN, BSN

Hello,

I live at 489 Union Rd, Brooklyn, WI, together with my wife and our 1 year and 3 year old sons. We have just learned there is a request for a conditional use permit to allow a portable asphalt plant to operate a mile and half southeast of us, right next to the town of Brooklyn, and we are very concerned.

The EPA clearly states asphalt fumes are toxic. They have been known to cause cancer, central nervous system problems, liver damage, respiratory problems, and skin irritation. It is especially concerning that there are schools and daycares within walking distance of these health hazards.

Beyond health hazards, there is a known loss of property value up to 56%.

Clearly this would be unacceptable to be so close to a community. It would greatly degrade the health and quality of life of our family and community.

Please consider the negative impacts this plant could have for our community and deny the conditional use permit.

We will be attending the public hearing next week as well

Sincerely,  
Daniel Baker & Carly Kurth

I write in opposition of the proposed Payn & Dolan Hot Mix Asphalt Plant. It concerns me that the survey only requests comments from the Brooklyn residents, which is actually located in the Village of Oregon. The proposed plant is only 2.5 miles from my home which I just purchased 6 months ago at a significant value and with very high taxes. The proposed plan will adverse impacts on property values and health for residents living near asphalt plants, documented losses of up to 56 percent because of the presence of a nearby asphalt plant.

In addition, there are health concerns. Asphalt plants release millions of pounds of chemicals to the air, including many Cancer-causing toxic air pollutants such as arsenic, benzene, formaldehyde and cadmium. Exposure to these toxics may cause cancer, central nervous system problems, liver damage, respiratory problems and skin irritation.

The proposed location is absolutely the worst for the community, due to many houses including a day care center are within less than a block.

To: Roger Lane, Zoning Administrator, Dane County Zoning and Land Regulation Committee

Reference: Response to Conditional Use Permit # 2510 Town of Oregon, Dane County by Wingra Real Estate LLC at 157 County Highway MM, for a Hot-mix asphalt plant

We are writing as a resident of the area adjacent to the Oregon Aggregate Site, on Bramble Lane. We moved to the neighborhood 1 ½ years ago to our retirement home in the country with wooded lands and farmland surrounding our property. As we settled in, we noticed railway cars parked on the tracks running north/south between Brooklyn and Oregon with the HazMat sign #1275 on each car. The signage indicated the chemical Propionaldehyde (a flammable liquid) and later understood by asking our neighbors that there is a 'gravel pit' to the south of our properties using this chemical for 'fracking'.

We have since observed the quarry, the mountains of material being excavated and had also been startled by the explosive-like noises throughout that summer and this one. The equipment in the quarry is non-stop noise throughout the summer months and the dust or silica is constantly in the air, blowing into the house via the screens and sticking to all our windows. The extra dust is definitely affecting my asthma related symptoms as well as the quality of life both outside and inside the house.

We are opposed to the addition of a hot-mix asphalt plant at the quarry site for the following reasons:

- 1) There are 3 neighborhoods adjacent to the quarry property: Bramble Lane, Country Meadows and the north side of Brooklyn that will be affected by the asphalt production. Regardless of meeting FDA standards, People living nearby are still exposed to cancer causing substances which can cause long term health consequences (arsenic, benzene, formaldehyde, arsenic and cadmium). These substances and other particulate matter can affect the central nervous system, liver and cause respiratory problems. Currently there isn't an OSHA standard for asphalt fumes thus possible affecting all who work within the asphalt production. (*Blue Ridge Environmental Defense League*). The quarry produces aggregate dust into the air and the hot asphalt production will additionally have toxic emissions and organic compounds (PAHs) even with fabric filters in the dryers at the plant.
- 2) It is not just the plant that is a concern, but the additional traffic required to move the product to other sites. As the product is loaded and transported, it continually emits dust and other toxic chemicals into the air (hydrocarbons and fumes) which will affect not only the above mentioned neighborhoods, but all areas the vehicles travel through.
- 3) There is the potential also for the asphalt plant to potentially pollute the ground water which again could affect all residential properties surrounding this site. A majority of home owners have private or shared wells and any contamination of the ground water would affect the water from our wells to our homes.
- 4) *Blue Ridge Environmental Defense League* has studied the impact of asphalt plants on health for residents and the adverse impact on property values. Property values could have up to a

56% decrease due to the presence of a new asphalt plant. Residents could experience more frequent health problems: headaches, high blood pressure, sinus problems, and shortness of breath.

- 5) According to the Comprehensive Town Plan, the following have been identified as important for consideration:
- a. quality of life “rural lifestyle with amenities of an urbanized area”; not synonymous with hot asphalt plant
  - b. Land use planning-storm water/ground water protection; this plant would not protect water
  - c. Outdoor recreation; this plant may discourage outdoor recreation (many cyclists travel on Union adjacent to this area, walkers enjoy the railway corridor for example)
  - d. Urban forestry-long term affects on the wooded areas north of this site (We and others in our subdivision are currently involved in woodland restoration of our properties. Our efforts (both financial and physical) are intended to improve and return the woodlands to its natural habitat and provide a healthy environment for human and wildlife.)
  - e. Encourage intergovernmental cooperation (Village of Brooklyn is adjacent to 157 County Highway MM) and should be part of the discussion.

We are opposed to any further development of the Oregon Aggregate Site towards a portable asphalt plant and are opposed to the Conditional Use Permit #2510.

Sincerely,

Linda Besser and Sandy Theune  
405 Bramble Lane  
Brooklyn, WI 53521

December 15, 2020

**REASON:**

Response to Petition CUP 2510 by Wingra Real Estate LLC at 157 County Highway MM in Dane County.

We, LeRoy Binger and Fern Binger are writing as residents (property owners) on Tony Lane in response to Conditional Use Permit #2510, Town of Oregon, Dane County by Wingra Real Estate LLC at 157 County Highway MM for a Hot-mix asphalt plant. We are opposed to the addition of this hot-mix plant at the quarry site.

The noise and excessive dust are problems now but we are also concerned about the potential health issues for toxic emissions into the air and potential pollution of wells and ground water. This would impact the woodland restoration of our property and reduce it's value. We have planted many thousands of trees during our living at our present address. The quality of the quiet rural lifestyle, we now experience, would be lessened. We have lived here for fifty one years & are concerned for the reasons stated above.

Sincerely,

LeRoy Binger & Fern Binger  
4950 Tony Lane  
Brooklyn, WI 53521

To: Roger Lane, Zoning Administrator, Dane County Zoning and Land Regulation Committee

Reference: Response to Conditional Use Permit #2510 Town of Oregon, Dane County by Wingra Real Estate LLC at 157 County Highway MM, for a Hot-mix asphalt plant

I hope I'm not too late to express my feeling regarding the above referenced proposal. I'm recovering from the COVID Virus and today was the first day I felt up to responding to this proposal..

Let me begin by saying in 1986 I moved into my home at 4901 Tony Lane, Brooklyn, WI. I was thrilled to live in the county on several acres surrounded by farmland. For years I enjoyed the tranquility, peace and quiet of living here. Unfortunately, as the years past this has changed and all but disappeared.

The railroad tracks not far from my property once were not in use. Now there are railway cars parked on the tracks running north/south between Brooklyn and Oregon with the HazMat sign #1275 on each car. The signage indicates the chemical Propionaldehyde (a flammable liquid) is aboard. This chemical is used for fracking by the gravel pit to the south of my property. The chemical could have the potential to make my health issues worse.

The above mentioned gravel pit at one time was inactive but not anymore. All summer I'm disturbed by explosive like noise that makes it uncomfortable to be outside or have the windows open in my home, In addition, the explosive noise has had a negative effect on the birds, deer and other wildlife that once frequented my property and surrounding area.

I'm also concerned there is the potential for the asphalt plant to pollute the groundwater. As I have a private well any contamination of the groundwater would affect the water from my well.

In addition, it is my understanding the Blue Ridge Environmental Defense League has studied the impact of asphalt plants on health for residents and the adverse impact on property values. Property values could have up to a 56% decrease due to the presence of a new asphalt plant. Residents could experience more frequent health problems, headaches, high blood pressure, sinus problems, and shortness of breath.

Therefore, I'm opposed to any further development of the Oregon Aggregate Site towards a portable asphalt plant and am opposed to the Conditional Use Permit #2510. I would appreciate it if you would let me know you have received this email and have forwarded it onto the ZLR Committee.

Thank you for your time.

To Roger Lane, Zoning Administrator, Dane County Zoning and Land Regulations Committee

As residents of 411 Bramble Lane, property directly to the North of where the asphalt plant is to be located, we are very much opposed to the proposed asphalt plant.

We have lived here for almost forty years and feel our quality of life has been affected by the opening of the quarry. Although it has been improved from the first year of existence, there is still constant noise and dust in the air during the summer. Not to mention that our beautiful rural Wisconsin landscape has been ruined. We already have this nuisance, why compound it by adding an asphalt plant? We are mystified as to why it should be located in such close proximity to so many homes, not only our neighborhood, but homes on Union Road and the whole village of Brooklyn. We are in opposition for the following reasons:

1. More noise
2. More dust and toxic emissions into the air. The toxic emissions are especially worrisome as they may be hazardous to health.
3. There is the potential for our ground water to be affected.
4. Potential loss of property value.

Thank you for taking our concerns into consideration.

Sincerely,  
Theodore and Rochelle Boucher

I am writing to express opposition to the Payne and Dolan request to locate a hot mix asphalt plant in the Town of Oregon, adjacent to the Village of Brooklyn and near our property. This application poses several major concerns for my husband and myself.

We are already tolerating the occasionally loud noises, heavy dust and truck traffic from the Payne and Dolan gravel operation in that same area. We believe that the addition of the hot mix asphalt plant will result in additional noise and truck traffic on Hwy MM in our area. In addition, we anticipate unpleasant odors from this plant. All of this has a negative impact on our property values, though it doesn't seem to have resulted in a reduction in the property taxes that we must pay.

The proposed location is too close to developed property, and should be rejected by county board members. Let them find a location further out in the undeveloped countryside, rather than so close to our neighborhood!

I must also add that we are somewhat irritated that the county meeting has been scheduled for a date so close to the Christmas holiday.

Please reject the Payne and Dolan application.

Sent from my iPhone

To Roger Lane,

12-7-2020

To Dane County Zoning,

In regards to Wingra Real Estate and Payne & Dolan, Inc. CUP # 2510 request for operating a temporary Asphalt Plant at the Oregon, WI. Site.

I am Jim Dorn. My wife Gloria and I have lived and owned our home at 254 County Road MM, Brooklyn, WI. 53521 for the past 37 years. It is located on the East side of Hwy MM across from the Pit. I have appreciated the way Payne & Dolan have been operating this Pit. The Brim seems to be high enough to eliminate a lot of the sound and dust. They keep the brim mowed and planted trees on it. I thank them for that. Also before COVID they always had a yearly very nice open house for us neighbors and updates on what they were doing.

On the Map that was sent for the Asphalt Plant it does not show where this is going to be located at this site. It's a big area there. Also I do NOT like the 5:00AM start up time. 6:00AM would be better. I also am not sure how they will keep the noise level down??

What about the Smell that would come from making the Asphalt?? I do not want to smell Hot Asphalt all day long.

What will this do to the Ground Water over time also??

How many years do they plan on having this Plant there??

With these above questions and request that I do not have answers for.

**I do NOT want the Asphalt Plant there.**

Way back when they requested to open the Site for extraction there was no mention of an Asphalt producing Plant.

I will try to attend and listen to the Dec.22 meeting. But I have not had much luck getting the Zoom app to work for me.

I would appreciate a call or email reply from someone about my concerns.

Thank you,

Jim Dorn

To: Jerry Bollig, Chairperson

Re: Response to Conditional Use Permit #2510 Town of Oregon, Dane County by Wingra Real Estate LLC at 157 County Highway MM, for a Hot-mix asphalt plant

We are writing in opposition to further development of the Oregon Aggregate Site towards a portable asphalt plant and Conditional Use Permit #2510. We purchased a property on Bramble Lane ten years ago that is adjacent to the Oregon Aggregate Site. It was the wooded lot, the adjacent farm fields and quiet neighborhood that attracted us to this area and this home. Several years ago when the operation at quarry expanded, the quiet we had so enjoyed was shattered. The quiet has been replaced by the incessant hum of heavy equipment and the daily explosive blasting. The dust and silica that is constantly in the air makes its way into our home and is impacting our respiratory health.

We are concerned with the health hazards that we will be exposed to if the quarry adds hot-mix asphalt to their operations. The exposure to substances such as, arsenic, benzene, formaldehyde and cadmium has been shown to cause cancer. In addition to cancer, these substances can impact the central nervous system and cause liver and respiratory problems. There is the potential for the asphalt plant to pollute the ground water. As private well owners, this additional potential for health hazard is concerning. A study by Blue Ridge Environmental Defense League indicated that residents living near asphalt plants experience more frequent health problems such as, headaches, high blood pressure, sinus problems and shortness of breath.

Additionally, we are concerned with the impact the expanded operation would have on our property values. The Blue Ridge Environmental Defense League shared in a study that an asphalt plant has an adverse impact on property values, potentially reducing values by up to 56%.

We are fiercely opposed to the any further development of the Oregon Aggregate Site towards a portable asphalt plant. We are opposed to the Conditional Use Permit #2510.

Sincerely,

David and Aimee Dorn  
403 Bramble Lane  
Brooklyn, WI 53521

Mr. Bollig,

My name is Karley Eggers and I am a resident of the Marcie/Cedar/Pine neighborhood in Brooklyn, Wisconsin. My fiancé and I moved to Brooklyn in order to be close to his family and have access to a great school district, not to live next to an odorous asphalt plant.

The current quarry pit already produces a noticeable amount of noise and I am concerned about not only the increase in noise pollution but also the air pollution that will come with it. The new asphalt plant will be a mile from Brooklyn Elementary school and mere hundreds of yards away from a neighborhood filled with young families and their children.

This new plant will have a profound effect on Brooklyn business, existing and future. And not to mention the property value in our quaint little neighborhood.

Please advocate for the health of the community members in Brooklyn.

Vote no to the new asphalt plant.

Thank you

Karley Eggers

December 14, 2020

To: Roger Lane, Zoning Administrator, Dane County Zoning and Land Regulation Committee

Regarding: Notice of Public Hearing Conditional Use Permit #2510 Town of Oregon

To Whom It May Concern,

We are writing to express written opposition to the Zoning Permit that would allow a Hot-mix asphalt plant near our neighborhood. We live north of the proposed site and already have experienced many negative effects from the last expansion of the quarry towards our house.

When we moved to our neighborhood, we wanted to raise our family in a quiet, rural setting. However, with the addition of the gravel quarry expansion (and now proposed hot-mix asphalt plant), we have had to deal with a significant increase in noise pollution, quarry aggregate dust, along with other potential pollutants that come out of a quarry.

We are very concerned about the level of chemicals that would be associated with a hot-mix asphalt plant and the proximity to our neighborhood.

Other negative effects include: the possibility of increased noise and smells from the plant, home/property devaluation, the length of the permit, quality of life (both indoors and out), land use planning (storm water/ground water protections), outdoor recreational impacts, long term affects to our property, and the encroachment on our neighborhood.

Please reject this permit!!!

Sincerely,

Ryan and Kimberly Finnessy  
423 Bramble Lane  
Brooklyn, WI 53521

To whom it may concern,

I am writing in concern of Hot-mix asphalt plant off of Highway MM.

First of all the truck traffic past my house it terrible as it is, without hauling asphalt

Out of the pit. What about air quality, the cancer causing crap in the air, the property

Value going down? The smell of tar (who wants that)?

With the sand pit there our vehicles are covered with sand, the dust in the house is horrible. The noise

And dust we can't enjoy the windows open . The list goes on.

Please reconsider all of this nonsense.

Than you,

Dean Meister

December 15, 2020

To: Roger Lane, Zoning Administrator, Dane County Zoning and Land Regulation Committee

Reference: Response to Conditional Use Permit # 2510 Town of Oregon, Dane County by Wingra Real Estate LLC at 157 County Highway MM, for a Hot-mix asphalt plant

We are writing as residents of 417 Bramble Lane which is north of the Payne and Dolan aggregate site. My wife and I have lived here for 37 years. We are here because of the quality of life that is offered. This has changed drastically with the addition of a largescale landscape maintenance company and the Payne and Dolan site. Our spring, summer and fall months are filled with construction noise. Backup beeping, cranes and bulldozers. Now mountains of aggregate material sit waiting for winds to carry silica across the area and into our homes. We can see clouds of sandy dust on windy days which is definitely affecting my wife's summer allergies, and our quality of life both outside and inside the house.

Payne and Dolan have claimed to have gotten no complaints. **I personally called the Wisconsin Department of Natural Resources many times to report the blowing sand coming from the site. No response. We have asked P&D to plant more barriers of plants to obscure the view, which they did. The deer population completely destroyed the new plants, and they were never replaced.**

Now Payne & Dolan are claiming that screening berms of trees, which do not exist, will protect us from even worse new asphalt plant noise, smell and pollution that will be generated.

Payne&Doyle Permit #2510 states: **"The proposed portable asphalt plant will be held to the same standards of public health, safety, comfort and general welfare to ensure that the Town of Oregon and Dane County are not negatively affected by the proposed plant. The perimeter screening berms and lower elevation of the operations area currently shield vision of the crushing, washing, and load out areas and they will help do the same for the asphalt plant."**

Our ground is at danger with chemicals being used in their operations and now you would like us to embrace an asphalt plant. This is unacceptable. I would presume Hwy.MM would be a major truck corridor. More usage and damage that would have to be repaired using taxpayer funds. My wife and I are both in our 70s. I have malignant melanoma of the lung. We do not need more assaults on our health. We do not need more assaults on our environment. Quality of life.

We are opposed to any further development of the Oregon Aggregate towards a portable asphalt plant and are opposed to the Conditional Use Permit #2510.

Sincerely and respectfully,

Gene I Prigge and Kathleen S Prigge  
417 Bramble Lane  
Brooklyn, WI 53521

We also are opposed to the addition of a hot-mix asphalt plant at the quarry site for the following reasons:

- 1) There are 3 neighborhoods adjacent to the quarry property: Bramble Lane, Country Meadows and the north side of Brooklyn that will be affected by the asphalt production. Regardless of meeting FDA standards, People living nearby are still exposed to cancer causing substances which can cause long term health consequences (arsenic, benzene, formaldehyde, arsenic and cadmium). These substances and other particulate matter can affect the central nervous system, liver and cause respiratory problems. Currently there isn't an OSHA standard for asphalt fumes thus possible affecting all who work within the asphalt production. (*Blue Ridge Environmental Defense League*). The quarry produces aggregate dust into the air and the hot asphalt production will additionally have toxic emissions and organic compounds (PAHs) even with fabric filters in the dryers at the plant.
- 2) It is not just the plant that is a concern, but the additional traffic required to move the product to other sites. As the product is loaded and transported, it continually emits dust and other toxic chemicals into the air (hydrocarbons and fumes) which will affect not only the above-mentioned neighborhoods, but all areas the vehicles travel through.
- 3) There is the potential also for the asphalt plant to potentially pollute the ground water which again could affect all residential properties surrounding this site. A majority of home owners have private or shared wells and any contamination of the ground water would affect the water from our wells to our homes.
- 4) *Blue Ridge Environmental Defense League* has studied the impact of asphalt plants on health for residents and the adverse impact on property values. Property values could have up to a 56% decrease due to the presence of a new asphalt plant. Residents could experience more frequent health problems: headaches, high blood pressure, sinus problems, and shortness of breath.
- 5) According to the Comprehensive Town Plan, the following have been identified as important for consideration:
  - a. quality of life "rural lifestyle with amenities of an urbanized area"; not synonymous with hot asphalt plant
  - b. Land use planning-storm water/ground water protection; this plant would not protect water
  - c. Outdoor recreation; this plant may discourage outdoor recreation (many cyclists travel on Union adjacent to this area, walkers enjoy the railway corridor for example)
  - d. Urban forestry-long term affects on the wooded areas north of this site (We and others in our subdivision are currently involved in woodland restoration of our properties. Our efforts (both financial and physical) are intended to improve and return the woodlands to its natural habitat and provide a healthy environment for human and wildlife.)
  - e. Encourage intergovernmental cooperation (Village of Brooklyn is adjacent to 157 County Highway MM) and should be part of the discussion.

**Subject:** Payne an Dolan Application for a Hot Mix Asphalt Plant in the Town of Oregon  
**Date:** Tuesday, December 15, 2020 5:38:13 PM

---

CAUTION: External Email - Beware of unknown links and attachments. Contact Helpdesk at 266-4440 if unsure

I am writing to express opposition to the Payne and Dolan request to locate a hot mix asphalt plant in the Town of Oregon, adjacent to the Village of Brooklyn and near our property. This application poses several major concerns for my husband and myself.

We are already tolerating the occasionally loud noises, heavy dust and truck traffic from the Payne and Dolan gravel operation in that same area. We believe that the addition of the hot mix asphalt plant will result in additional noise and truck traffic on Hwy MM in our area. In addition, we anticipate unpleasant odors from this plant. All of this has a negative impact on our property values , though it doesn't seem to have resulted in a reduction in the property taxes that we must pay.

The proposed location is too close to developed property, and should be rejected by county board members. Let them find a location further out in the undeveloped countryside, rather than so close to our neighborhood!

I must also add that we are somewhat irritated that the county meeting has been scheduled for a date so close to the Christmas holiday.

Please reject the Payne and Dolan application.

I oppose the rezoning of land in the township of Oregon for the an asphalt plant. \_

I moved to out of to the Town of Rutland 40 years ago to enjoy the fresh air, quite and lack of congestion. Rezoning in this area for the profit of a few investors profit will deprive long term residents of their quality of life and lower their property values.\_ \_

Will the Brooklyn Elementary School need to cancel outdoor recess whenever there is a North Wind do to the toxic fumes?\_

Dane County Zoning will have a public hearing in the dark of night on December 22 at 6:30 PM to discuss this proposal.

Petition: CUP 2510

December 14, 2020

Oregon / Section 36

Reason: Hot-mix asphalt plant

Roger Lane

Zoning Administrator

I received this noticed CUP2510 about a Hot-mix asphalt plant in 157 County Highway MM. I would like to elevate my concern due to several reasons;

**HEALTH:** Asphalt plants release millions of pounds of chemicals to the air, including many Cancer-causing toxic air pollutants such as arsenic, benzene, formaldehyde and cadmium. Exposure to these toxics may cause cancer, central nervous system problems, liver damage, respiratory problems and skin irritation.

The proposed location is absolutely the worst for the community, due to many houses including a day care center are within less than a block.

**PROPERTY VALUE:** A study on the adverse impacts on property values and health for residents living near asphalt plants, documented losses of up to 56 percent because of the presence of a nearby asphalt plant.

I hope you consider these observations for the health of the community and the environment.

Thank you,

Melvy Villa Thuss

10 Commercial Avenue

Dane County Zoning and Land Regulation Committee  
C/O County of Dane  
City-County Building  
210 Martin Luther King Jr. Blvd.  
Madison, WI 53703

December 15, 2020

Dear Dane County Zoning and Land Regulation Committee Members,

We are writing to you regarding Payne and Dolan's Petition CUP #2510 on behalf of the residents of the Village of Brooklyn. **NOTE** - the public notice stated written testimony must be submitted by December 15, however a cut-off time was NOT specified.

On December 14, 2020 the Village of Brooklyn board met and discussed Payne and Dolan's Petition CUP #2510 with our residents. As a result of that discussion, we created a survey (responses enclosed) so their views could be captured, quantified and shared with you.

On page 4 of Payne and Dolan's CUP application, number 2, they state, "The uses, values, and enjoyment of other property in the neighborhood for purposes already permitted shall be in no foreseeable manner substantially impaired or diminished by establishment, maintenance or operation of the conditional use." The applicant has failed to provide ANY support from certified appraisers that an asphalt plant located within 340 yards of a residence will NOT devalue said property. There are 93 residences and a daycare center 340 to 638 yards due south of the facility. ALL of those properties WILL be DEVALUED by this proposed plant, which WILL cause the Village of Brooklyn to lose property tax revenue. The applicant makes NO mention of compensation for these losses to either the property owners or the Village of Brooklyn.

On page 5 of Payne and Dolan's CUP application, number 3, they state, "The land uses on the surrounding properties are predominantly agriculture. The land use on the property to the south is a reclaimed mineral extraction site." The applicant has OMITTED the fact that 93 residences and a daycare center are 340 to 638 yards due south of the facility and the Elementary school is 880 yards south west of the facility and WILL be negatively impacted by the proposed plant.

The proposed asphalt plant is a portable plant and will not be run year round. It is our understanding the applicant intends to operate the proposed asphalt plant mostly during the summer when the families that live in the 93 residences 340 to 638 yards due south would like to enjoy their yards. Despite the odor mitigation proposed, smells will still be carried to the adjacent residences by the wind. Regardless of how often the proposed plant is used, it WILL STILL DEVALUE the surrounding properties.

Even the best mitigation strategies are not 100% effective; petroleum based products can seep into the ground water and lead to illness, cancer and other long term health problems.

During the first five hours our survey was open, we received 131 responses. Of the 131 responses, 113 opposed this CUP application. We have attached the survey summary for your review.

We will keep the survey open until December 18<sup>th</sup> and present updated results to this committee during the December 22<sup>nd</sup> meeting.

On behalf of the residents of the Village of Brooklyn, we respectfully request this CUP application be denied.

Sincerely,

The Village of Brooklyn Board Members

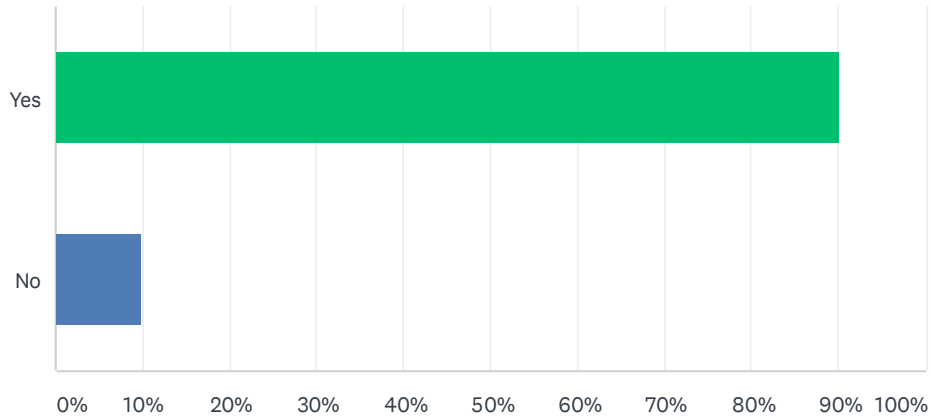

and

*Brit Springer*

**Q4 Please list the specific aspects of the proposed hot-mix asphalt plant that will negatively impact your ability to enjoy your property.**

**Answered: 83 Skipped: 48**

#	RESPONSES	DATE
1	Mess, air quality, noise	12/15/2020 6:10 PM
2	Smell and any potential environmental impacts known or currently unknown.	12/15/2020 5:51 PM
3	Concerns over noise, traffic, and smell	12/15/2020 5:38 PM
4	Smell noise traffic	12/15/2020 5:32 PM
5	Quality of air by introducing known carcinogens into the environment.	12/15/2020 4:53 PM
6	Noise, smell	12/15/2020 4:46 PM
7	Noise, air pollution, odorous smell, increase traffic on 2 lane roads.	12/15/2020 4:26 PM
8	Dust and sand piles are currently blowing from Payne& Doyle sand quarry into our homes and lungs. They claim non existent tree berms will also protect us from asphalt plant. The small trees they planted are dead and not shielding us now!	12/15/2020 4:25 PM
9	Asphalt plants are known to produce airborne carcinogens.	12/15/2020 4:20 PM
10	Decreased property value. Hours of operation being abused as current jake break ordinances are by current semis going through. Roads will be effected and ruined. Potential air quality concerns.	12/15/2020 4:17 PM
11	The smell will make it difficult to enjoy being outside on our property, and we are concerned about carcinogens	12/15/2020 4:03 PM
12	Beyond the impact of my properties value, noise, etc., the increase of truck traffic to and from the plant would cause additional safety concerns.	12/15/2020 4:01 PM
13	Pollutants in the air are dangerous for everyone including my animals	12/15/2020 4:00 PM
14	air quality	12/15/2020 3:49 PM
15	Chemicals being released into the air, diminishing property values	12/15/2020 3:36 PM
16	I have concerns with noise levels, debris causing discoloration of my property, air quality and increased traffic. Also, the glaring obvious concern of the disrupted view out of my patio door, bedroom and living room windows.	12/15/2020 3:34 PM
17	sight sound smell breath maybe even taste ,probably all basic sences...traffic etc etc	12/15/2020 3:27 PM
18	The toxic chemicals that are released.	12/15/2020 3:25 PM
19	Pollutants and decrease value on home	12/15/2020 3:25 PM
20	Toxic fumes known to cause health problems, reduction in property value, & noise pollution.	12/15/2020 3:23 PM
21	asphalt smells - even with the suppressor (the oxygen scavenger). Petroleum derivatives and particles are bad for the water and air quality.	12/15/2020 3:22 PM
22	Cancer causing chemicals in the air.	12/15/2020 3:20 PM
23	Property value, smell, fumes, etc	12/15/2020 3:19 PM
24	bad smell, debris, noise, pollution	12/15/2020 3:18 PM
25	Truck traffic. Both with noise and increased traffic.	12/15/2020 3:18 PM
26	This is basically in my backyard. I don't want the smell, any pollution, additional noise, or additional truck traffic. The current site and the farm located on that site are already enough of problem, burning trash, and causing noise pollution.	12/15/2020 3:14 PM
27	smell (their mitigation strategy is NOT as effective as their application portrays), environmental (petroleum based products like asphalt negatively impact water and air quality)	12/15/2020 3:12 PM
28	I'm concerned about the potential for dust, and chemicals being used to conceal the smell (also concerned for the smell that may be stronger than the chemical used to conceal.	12/15/2020 3:07 PM
29	Smell, noise, air quality	12/15/2020 3:05 PM
30	Air quality, smell, and noise.	12/15/2020 3:05 PM

## Village of Brooklyn - Payne and Dolan Asphalt Questionnaire

31	Safety – industrial activity immediately adjacent of residential neighborhood, elementary school, and daycare Pollution - Asphalt plants are known to produce toxic air pollutants, including arsenic, benzene, formaldehyde, and cadmium, that may cause cancer, central nervous system problems, liver damage, respiratory problems and skin irritation. Noise & odor - Unpleasant odor emitting from: the asphalt plant, asphalt being loaded into trucks, asphalt being transported, and diesel fumes from trucks. Traffic - Increased truck traffic on MM, 92, 104. Truck traffic on these routes has been increasing for years thanks to businesses such as the Paine & Dolan gravel pit, and industrial dairy farms off 104 to the south. This will only increase that traffic. Trucks deteriorate roadways and impact quality of life within the village limits (speeding, jack brakes, etc.). Property values - The hot mix asphalt plant activity will negatively affect the value of properties all around its perimeter and of Brooklyn as a whole.	12/15/2020 2:59 PM
32	Noise, smell, traffic	12/15/2020 2:55 PM
33	Traffic on MM is already congested enough and poses a traffic risk. In addition, concern with toxins that will be released by the plant.	12/15/2020 2:53 PM
34	Reduction of air quality, and an increase in noise pollution and odor.	12/15/2020 2:51 PM
35	Pollution/smell/noise, traffic/congestion on MM, worry about carcinogens in air and property devaluation potential	12/15/2020 2:50 PM
36	toxic air pollutants with potential for long term damage - including cancer, central nervous system problems, liver damage, respiratory problems, etc.; Also, fumes/smell, pollution, noise, lower property values,	12/15/2020 2:46 PM
37	Smell	12/15/2020 2:38 PM
38	Not only will are there noise and odor concerns but there environmental concerns, specifically groundwater and air quality issues.	12/15/2020 2:35 PM
39	Smell, noise and concern for pollution.	12/15/2020 2:32 PM
40	Fumes, potentially harmful off gassing, traffic	12/15/2020 2:32 PM
41	It is a risk for health and property value.	12/15/2020 2:30 PM
42	Property value decrease alone negatively impacts the enjoyment of my property. The chemicals released in the air negatively effect my health, my children's health. We moved here to enjoy our outdoor space. This plant will not allow us to do that.	12/15/2020 2:29 PM
43	it's not about "enjoying" my property - it's about the severe health implications for all that come from being so close to a manufacturing facility that will produce known air pollutants and carcinogens. This is especially unconscionable when children - the people most vulnerable to toxins - will be directly impacted	12/15/2020 2:28 PM
44	None	12/15/2020 2:24 PM
45	Noise,smell,traffic	12/15/2020 2:18 PM
46	Smell	12/15/2020 2:11 PM
47	Is there a plan for chemicals released into the air? What specific benefits would there be for residents of Brooklyn?	12/15/2020 2:10 PM
48	Possibly more traffic as I do not live close	12/15/2020 2:07 PM
49	Possibly traffic. And the smell	12/15/2020 2:05 PM
50	Smell	12/15/2020 2:05 PM
51	The health risks of my family.	12/15/2020 2:05 PM
52	Traffic in and out, noise of trucks and odor	12/15/2020 2:03 PM
53	HEALTH: Asphalt plants release millions of pounds of chemicals to the air, including many Cancer-causing toxic air pollutants such as arsenic, benzene, formaldehyde and cadmium. Exposure to these toxics may cause cancer, central nervous system problems, liver damage, respiratory problems and skin irritation. The proposed location is absolutely the worst for the community, due to many houses including a day care center are within less than a block. PORPERTY VALUE: A study on the adverse impacts on property values and health for	12/15/2020 2:02 PM

## Village of Brooklyn - Payne and Dolan Asphalt Questionnaire

residents living near asphalt plants, documented losses of up to 56 percent because of the presence of a nearby asphalt plant.

54	Odor and noise.	12/15/2020 1:59 PM
55	Previous studies have shown hazardous emissions from asphalt plants and a almost guaranteed reduction in property value.	12/15/2020 1:56 PM
56	We, as residents, pay an exorbitant amount of property taxes for very little village amenities. Having an asphalt plant in our neighborhood is another hit to our village. It will cause families to possible want to stay more indoors due to the smell & deter families from wanting to move to our village. Please reconsider this plan, as it is not a good place for this plant.	12/15/2020 1:56 PM
57	SMELL Unsure of noise levels.	12/15/2020 1:51 PM
58	Smell, noise, trucks in and out of the plant, potential pollutants, decreased property value, visual pollution	12/15/2020 1:48 PM
59	The smell and noise. Air quality	12/15/2020 1:46 PM
60	None	12/15/2020 1:44 PM
61	Traffic and noise.	12/15/2020 1:42 PM
62	Strong smell, noise, and reduce my property value as well as deter new residents to Brooklyn.	12/15/2020 1:40 PM
63	Noise, air, water pollution.	12/15/2020 1:40 PM
64	-peace and quiet -the smell -the increased use of roads	12/15/2020 1:40 PM
65	The plant will in my view directly out my front window from my living room. Not to mention the fact that this will more than likely take my property value down...that is unacceptable. I have worked hard to earn a nice house and I will be dammed if some company will bring that value down!!	12/15/2020 1:37 PM
66	Noise. Truck traffic and smell.	12/15/2020 1:34 PM
67	The smell of the asphalt and the additional trucks on are road to Brooklyn.	12/15/2020 1:24 PM
68	The smell of the asphalt gives me headaches.	12/15/2020 1:22 PM
69	Smell, safety and noise	12/15/2020 1:17 PM
70	Carcinogens, noise, unpleasant smells, concern for how they manage their equipment and waste for environmental concerns.	12/15/2020 1:15 PM
71	Chemical pollution, noise pollution, property devaluation	12/15/2020 1:14 PM
72	Concern over asphalt odor from the plant and increased semi truck traffic.	12/15/2020 1:12 PM
73	Smelling hot tar fumes is not compatible with how close this is to a residential neighborhood. Having a plant like this near our homes will reduce property values since people will be concerned with smoke, noise and smells.	12/15/2020 1:11 PM
74	Odor, but primarily the known health effects of living near one and the carcinogenic materials that they give off.	12/15/2020 1:10 PM
75	I don't forsee it negatively impacting me. I like nice roads so there needs to be a place to do that plus this is only temporary	12/15/2020 1:06 PM
76	Smell, air quality	12/15/2020 1:01 PM
77	Noise pollution. Added traffic to the already many dump trucks coming in and out of quarry. Added smell	12/15/2020 1:00 PM
78	Smell, noise	12/15/2020 12:55 PM
79	This will be basically in my backyard and will not be able to enjoy my summer nights out back having to smell the asphalt. I live right next to the farm and am not looking forward to this at all. I also see losing value to my home because of this and no one wanting to buy our home with this plant here.	12/15/2020 12:51 PM
80	Airborne pollution seems likely with asphalt.	12/15/2020 12:51 PM

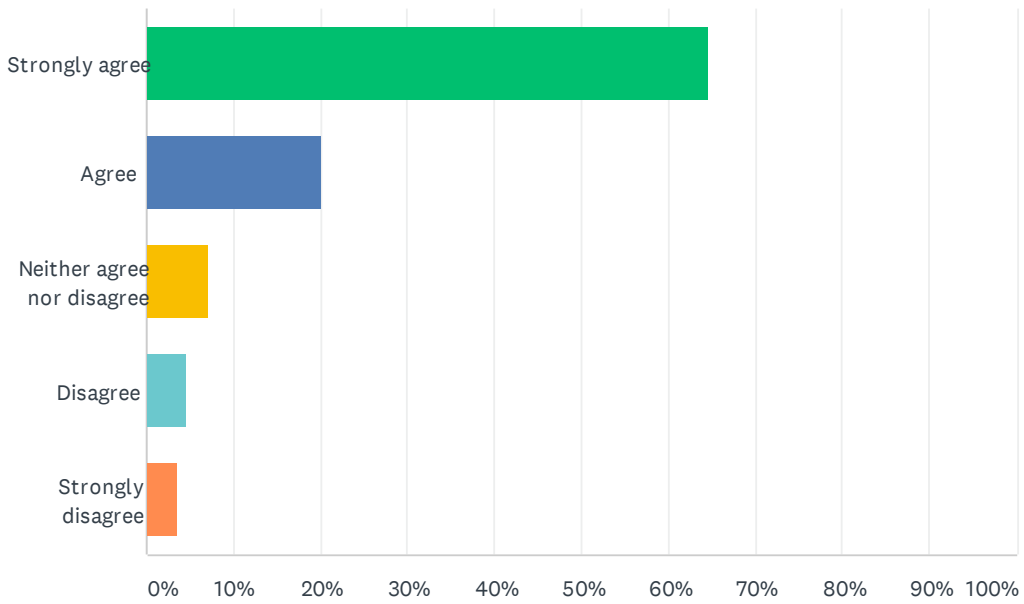

## Village of Brooklyn - Payne and Dolan Asphalt Questionnaire

81	Smell, decrease in property value	12/15/2020 12:49 PM
82	Smell, heavy duty traffic	12/15/2020 12:48 PM
83	It will not negatively effect us. It will be great for our community and bring in another business	12/15/2020 12:47 PM
84	Smell and air quality major concerns as well as possibly noise and traffic, additional less major concerns	12/15/2020 12:45 PM
