**Zoning Change Application**

Items that must be submitted with your application:

- o **Written Legal Description of the proposed Zoning Boundaries**  
Legal description of the land that is proposed to be changed. The description may be a lot in a plat, Certified Survey Map, or an exact metes and bounds description. A separate legal description is required for each zoning district proposed. The description shall include the area in acres or square feet.
- o **Scaled Drawing of the location of the proposed Zoning Boundaries**  
The drawing shall include the existing and proposed zoning boundaries of the property. All existing buildings shall be shown on the drawing. The drawing shall include the area in acres or square feet.

Narrative: (reason for change, intended land use, size of farm, time schedule)

- o Separation of buildings from farmland
- o Creation of a residential lot
- o Compliance for existing structures and/or land uses
- X Other:

The purpose of the requested zoning change is to eventually seek a permit to build an accessory building on our property, the height of which would exceed the 12 foot maximum height designated in the A-1(ex) zoning. The accessory building will be a single story structure, but will be built atop the existing detached concrete garage. The height will be 9-10 feet at street level, but 22-23 feet high on the side faced by the garage, which is built into a slope.

The accessory building will house a Limited Family Business that is currently conducted within the family residence. The business ("BroodMinder") serves the agricultural practice of beekeeping. BroodMinder develops, assembles, and sells wireless electronic beehive monitors, including a temperature and humidity measuring devices and a hive scale. The goal of the company is to sustain honey bees by giving beekeepers information to guide best practices to enhance hive success. The information collected is shared with beekeepers throughout the U.S.

The property is fully developed. The accessory building would not increase the square footage of property occupied by buildings, nor change the drainage or other use or structure of the property. The property is 1.3 acres.

- **Outdoor activities:** There are four beehives on the property used to test BroodMinder products.
- **Outdoor lighting:** Wall-mounted residential outdoor lights turned on in the evening and off generally by 10 pm.
- **Outside loudspeakers:** None
- **Proposed signs:** None
- **Trash removal:** Trash and recycling produced by BroodMinder is minimal and is included within the weekly family trash and recycling pick-up.
- Six Standards of CUP (see back)

The statements provided are true and provide an accurate depiction of the proposed land use. I authorize that I am the owner or have permission to act on behalf of the owner of the property.

# Six Standards of a Conditional Use Permit

Provide an explanation on how the proposed land use will meet all six standards.

1. The establishment, maintenance or operation of the conditional use will not be detrimental to or endanger the public health, safety, comfort or general welfare.

The operation of the limited family business takes place within the family home. There are four beehives on the property used to test the wireless beehive monitoring devices produced by the business. The hives do not constitute a hazard because they are situated about 50 feet from the family residence and 70 feet from the nearest neighbor, and are separated from the neighbor's property by thick vegetation.

2. The uses, values and enjoyment of other property in the neighborhood for purposes already permitted shall be in no foreseeable manner substantially impaired or diminished by establishment, maintenance or operation of the conditional use.

This family business places no impediments to neighbors' enjoyment of their property, and constitutes no competition with any other businesses. With the exception of beekeeping (described in the section above) all business activities currently take place within the family home. Because it is an e-commerce business, there are no traffic or parking issues and no strangers approaching the local properties. There are occasional deliveries of materials used for the business, and these are provided by the US postal service or UPS and represent small to medium-sized packages that are placed in the mailbox or front porch.

3. That the establishment of the conditional use will not impede the normal and orderly development and improvement of the surrounding property for uses permitted in the district.

The accessory building for which we will be seeking a permit to build in 2018 depends on approval of an application for zoning change from A-1 (ex) to A-2 (1). If approved, the planned accessory building will be built atop the existing detached concrete garage and will face the front yard where it will be accessible at yard-level. It will be built in the same style and with the same finishes as the family home and will have a residential rather than commercial appearance.

4. That adequate utilities, access roads, drainage and other necessary site improvements have been or are being made.

The business is run within the existing family home, which is fully improved, including utilities, roads, and drainage. If the accessory building is approved, the only utility required will be electrical wiring.

5. Adequate measures have been or will be taken to provide ingress and egress so designed as to minimize traffic congestion in the public streets.

As mentioned above, the family business has minimal effect on traffic via occasional deliveries by USPS or UPS. The driveway of the residence allows space for delivery vehicles to park, turn around, and leave as needed, so no parking on the road is necessary.

6. That the conditional use shall conform to all applicable regulations of the district in which it is located.

The family business qualifies as an agricultural business consistent with A-1(ex) or A-2(1) zoning because it exclusively serves the agricultural undertaking of beekeeping.
