FROM: Jeanne Whitish, Member - Meier Road, LLC

Subject: CUP 2020-2503, 3382 Meier Road, Parcel 0710-241-9000-6

Dear Ms. Andros:

I am in receipt of the above mentioned CUP application. Our site is located at 3395 Meier Road, Madison, WI just to the south of the above mentioned site.

Currently the stormwater to the north all passes over our site, and in the event we want to try and improve anything we are forced to either treat 100% of that water before discharge, or pipe it from the north culvert the entire distance of our property which is cost prohibitive.

We provide the composting services for the greater Dane County area, via municipal contracts and the Meier Road location is a key location due to its proximity to Madison public works.

Though I like the idea of the solar energy production, I am concerned that currently there does not appear to be any plan other than vegetation for stormwater management, as I've contacted the developer as well. This also gets a bit more complicated as these lands will be entering the City at the end of this year.

Thank you for your consideration.

Sincerely,

Jeanne Whitish
