County Board Members,

Please vote "NO" to Authorizing the Purchase of Yahara Hills Land for County Landfill. This design has yet to be tested anywhere else so close to a densely populated area so there are too many unknowns regarding the full impact of this new experimental landfill and compost collection design to the quality of life, health and safety, and property value of so many families. Our communities deserve more answers.

Madison and the surrounding areas are slowly being bought up by corporations who don't have the best interest of the community at heart. We ask that YOU, as the officials do your part to hear from the people you represent. Taking up precious farm land on the back side of McFarland is going to change the future of our town and community in a drastic way. Add Amazon in cottage grove, the solar plant in Cambridge and now the dump slowly impeding on McFarland and it's community and we are losing the heart of what makes living here so unique. Not to mention the impacts on the health of our members.

After living in Nashville, TN and watching what corporate America and tourism did to the local population and community, I am fearful that our elected officials are only after the financial gain and are not thinking properly about what this does to the future of our town or how this impacts us long-term.

Please consider. Slow this process down. Weigh the sides and listen to your people. Please, we are begging you.
