County Board Members,
Please vote "NO" to Authorizing the Purchase of Yahara Hills Land for County Landfill. This design has yet to be tested anywhere else so close to a densely populated area so there are too many unknowns regarding the full impact of this new experimental landfill and compost collection design to the quality of life, health and safety, and property value of so many families. Our communities deserve more answers.
As a resident of the Town of Cottage Grove, I dealt with the landfill when I lived on HWY AB. We moved as a result and now THIS again! Haven't the people that live in this area been affected enough? The least that the County and elected public officials could do is slow this process down so that the constituents and residents living in the affected communities have time learn of this project and get a better understanding of the long-term impact it will have on our family's health, safety, and quality of life.
Thank you for your consideration of this request,
Lynn Parks
