I am writing because I have questions. i live at 3821 schnieder dr on the corner of green.

first i'm disappointed about the towns notification to me. what guarantees do i have that this won't expanded later down the road? why isn't closer to the road to save cost and tear up more land, let the state put it in there back yard. who is going to put up silt barriers at the creek. I would like to know what the contract and money is going too for how long?

If this is a good green idea it should be on display for all to see and be proud.

This whole thing STINKS we here pay taxes here and on my electric bill the state does not or Alliant.

I don't worry about my view I look at boat storage every day that i can't do on my property without a permit does the state have too?

Please pass this on to who can answer my questions.
