Healthy Aging

Healthy aging is “a lifelong process of optimizing opportunities for improving and preserving health and physical, social and mental wellness, independence, quality of life and enhancing successful life-course transitions” (Health Canada, 2002).

A New Vision...

- A society/community that:
 - addresses the basic needs of older residents (affordable housing, safety, food security, transportation, culturally and linguistically appropriate services);
 - celebrates diversity, refutes ageism and reduces inequities;
 - ensures equal opportunities for achieving optimal mental, physical, social wellbeing that enhances quality of life; and
 - provides age-friendly environments and opportunities for all older residents to enhance their independence and age-in-place.

Framework - Predictors/Equity

Communities that support aging

- **Lifelong Communities: A Framework for Planning**

Lifelong Communities are places where individuals can live throughout their lifetimes; they provide a full range of options to residents, insuring a high quality of life for all.

Source: Atlanta Regional Commission

- **Age-friendly cities/community**

According to the WHO, an age-friendly city or community is an inclusive and accessible urban environment that promotes active aging

Domains of an age-friendly city

LGBT Older Adults

LGBT Older Adults

Lesbian, gay, bisexual and transgender (LGBT) older adults may face additional risk factors for social isolation. According to the advocacy organization Services and Advocacy for Gay, Lesbian, Bisexual, and Transgender Elders (SAGE), LGBT older adults in America may face an increased risk for social isolation. SAGE reports “... the research shows that LGBT elders face higher disability rates, struggle with economic insecurity and higher poverty rates, and many deal with mental health concerns that come from having survived a lifetime of discrimination.” LGBT older adults are more likely to live alone, be single, and have no children. Therefore, they may have less family support, or feel stigmatized or excluded from the broader community.
