CHAPTER 49 IMPLEMENTATION

Proposed Implementation Process & Fee Schedule Land Conservation Committee Meeting February 28, 2019

Amy Piaget, County Conservationist Land Conservation Division

Implementation

- Winter Spreading Permits
- Certificate of Use
- Manure Storage Permits
- Agricultural Performance Standards
- Overarching Implementation Strategy
- Enforcement
- Fee Schedule

Winter Spreading Permits

2019

- Targeted Mailing
 - Landowners with manure storages but no documentation of 590 NMPs
 - Approximately 60
- Existing Permittees
 - All permittees to be notified (~ 77)
 - Expiring permits to be updated (~13)
- Walk-ins and Voluntary Compliance
- Complaints
- 2020 to 2024
 - Systematic mailings by township over four years
 - Tied to Farmland Preservation Program implementation process
 - Existing Permittees
 - Expiring permits to be updated
 - Walk-ins and Voluntary Compliance
 - Complaints

Winter Spreading Permits

- Continue status review process of reviewing approximately 25% of the permits issued annually
- Outreach Efforts
 - Direct mailings to targeted landowners
 - Local informational meetings
 - Agronomist focus groups/meetings
 - One-on-one landowner/staff interactions
 - NM planning workshops

Certificate of Use

2019

- Mail letters to all producers
 - Approximately 300 known structures
 - Include application
 - Return application by November 1st, 2019 waive application fees (??)
- Walk-ins and Voluntary Compliance
- Manure storage permit applicants with existing storages
- Complaints
- 2020 and beyond
 - Compliance process
 - Application fees required (??)
 - Conversion of permits to certificate of use

Certificate of Use

- Review and issue certificates in order of application received
- Work with landowners/operators one-on-one to address site specific situations
- Outreach to engineering consultants and agronomists
- Once issued, conduct annual compliance checks on 25% of the active certificates

Manure Storage Permits

Review and issue as applications are submitted

Update application for new requirements

- Outreach to engineering consultants
- Once issued, conduct status reviews for 25% of the permits annually

Agricultural Performance Standards

- Farmland Preservation Program status reviews
 - Follow current implementation process in ATPC 50
- Complaint response
 - Follow enforcement and cost-sharing processes in NR 151
- Use implementation of Winter Spreading Permits and Certificate of Use to identify nutrient management planning needs
 - Create prioritization for cost-sharing requirements
 - Issue formal offers of cost-sharing
- Outreach
 - Local informational meetings
 - Farmland Preservation Program status reviews
 - One-on-one landowner/staff interactions

Overarching Implementation

- Develop standard operating procedures for staff
- Create template letters and standardized applications
- Expand spatial data collection and management
- Update website with new procedures, forms and outreach materials
- Incorporate tracking and reporting into permitting procedures
- Ongoing education and outreach efforts

Enforcement

- Phased-in, incentive-based approach for voluntary compliance and education
- Follow current stepped enforcement procedures
- Update and expand standard operating procedures, templates, checklists, etc. for new ordinance references and requirements
- Review and update as needed tracking of complaints, enforcement actions

Fee Schedule

Chapter 14 – Current

- Manure Storage Permit for construction of new or modification/expansion of existing
 - \$750 application fee
 - Fee waived for manure storage closure applications
- Winter Spreading Permit
 - \$50 application/renewal fee

Chapter 49 – Considerations

- To be reviewed and set by LCC
- Considerations
 - Incentives to voluntarily comply
 - i.e. submit application before date to have fee waived
 - Hold fees the same for 2019
 - Update fees for 2020 and beyond
 - Scaled fees based on factors
 - i.e. animal units, acres, manure volumes??

Discussion/Questions

Amy Piaget, County Conservationist Land Conservation Division
