- **Equity in the Register of Deeds office:**

- The Register of Deeds office reshaped two job positions into one and altered the position requirements by eliminating strict job experience requirement usually found in the real estate and law fields. Our goal is to make our positions more attractive and attainable by accentuating life experiences and instead provide more training in our industry on the job. Our staffing has been consistent with little/no recruitment opportunities.
- The Register of Deeds office is currently looking into hiring another LTE for scanning projects for land records to help this individual gain some office skills and set them up for future employment opportunities.

- **Sustainability**

- Currently our electronically recorded land records is at an all-time high this year of 55% of the documents. This means, less envelopes, less postage, less employee time of handling a paper document, scanning it in, posting it, stuffing envelopes.
- We are continuing to back index older historical land records which allows more citizens and customers the ability to search online for their records, less use of computers in office. Saves on gas and parking to come to office for documents.
- Vital records state wide issuance- don't have to get vital records from the county you were born in any longer, we can access any vital record for the entire State of Wisconsin and issue certificates. Saves citizens time traveling to other counties for their vital records.
