D. Presentations

Continued presentation from Bill Huisheere.

Bill Huisheere provided an update on high school transition data he is gathering in order to compare with Dane County high schools to see if there are any statistical differences with the referrals to the ADRC by race. The data includes the students name, DOB, school they're attending whether or not eligible, race if they are enrolled (including name of the ICA/MCO) or not and if eligible and did not enroll the reason why.

Stroman said we have an idea of the prevalence of intellectual and developmental disabilities and those being disaggregated by sub group, we have information on eligibility categories and special education which is not a direct correspondence but can get a rough sense of the prevalence. DPI keeps track of this information for all public high schools in the state. She is interested in whether those rough statistics line up or not. One of the reasons that propels her to that inquiry is because the legacy county system and the grad policy would have excluded students who weren't able to stay in school until 21 or were not successful in meeting requirements having a job upon exit or other reasons. Stroman is curious if that would have an effect in filtering out the students who either dropped out or did not meet the grad policy requirements who otherwise would have qualified on a functional screen basis or adult long term care services.

E. Reports to Committee

Fischer asked people to review and see her for questions due to the length of the meeting and included them in her Manager report.
