

TO DANE COUNTY ZONE

PETITION CUP 2509

This petition is a very straightforward request to provide product for the town and the general area.

We have only two pits now. We did have seven.

This location is somewhat remote.

County B is a class A highway to be used for this very use as long as the loads are of legal weight.

This location has been open for a few years and has several million tons of deposit.

Gravel is the first use, however this pit will be able to supply much needed aggregate for this area.

I cannot see any defensible reason to not allow this petition.
