Re: Forever Sandfill & Limestone Inc.

CUP 2509 application supplement material

Dear Representatives

I have enclosed a property study that we had commissioned 2 years ago for another one of our sites. The study was conducted to compare rural residential home sales of homes close to and farther away from a pit or quarry.

I am submitting this in response to concerns brought up at the Town of Christiana Planning and Town Board meetings of low property values if a quarry is allowed. I believe this study should show that there is no negative affect on home values that are in close proximity to a quarry.

Thank you

Jeff Furseth
