

**Criminal Justice Council – Racial Disparities**  
**March 23, 2021 Meeting**  
**2021 Initiatives Brainstorm**

- Ongoing management of Community Justice Center and collaboration once needs assessment begins
- Increased data sharing, focused on sharing data accessibly with community members within context
- Creation of a data dashboard
- Development of a multi-disciplinary review team in collaboration with the jail population manager to determine where bottlenecks occur in length of stay and release
  - In juvenile justice, this already occurs, and the potential for major progress in the jail (rather than the detention center) is there
  - Similar to Lucas County team
  - Need to routinize reports to make them shareable and easy to review
- Violence reduction, particularly gun violence
  - Collaboration with Public Health – Madison Dane County and other agencies
- Examine data on technology during COVID and determine best practices to connect and engage with justice-involved people, particularly to reduce racial disparities
  - *The pretrial failure to appear data during remote hearings would likely be particularly useful*
