C. Action Items

Recorded Phone Line Recommendation

Meier distributed information on two possible solutions for evaluation by hospitals. Kep Anderson with Sun PRairie EMS did some research earlier this year for solutions. St. Mary's Sun Prairie has opted to implement a system using their existing phone system. The group continued to feel this was an important initiative and the hospitals shared in the past that a letter from MAS stating the reasoning would be helpful. Meier will draft a letter of recommendation for next meeting.

D. Discussion Items

Auto ALS Data Review

The review of 2014 auto ALS calls continues. There were 2078 auto aid calls and all but 70 have been reviewed. 96.6% data capture! Lohmeier feels he need to review the data and then pull it together for full analysis and recommendations by the subcommittee.

EMR Protocols

Lohmeier reports that the office is working on EMR protocols for a couple of fire departments looking to add this level of care. Working to simplify the current protocols to address just Emergency Medical Responders. Lohmeier feels this is a great opportunity for consistency in the County.

Anticoagulant History for Trauma Patients

Lohmeier looked for opinions from hospital representatives about the addition of anticouglation medication therapy in EMS medical history. All hospitals agreed and EMS providers felt this was manageable. Lohmeier will pull together a list of top medication names to assist. This will be included in radio report format for all patients.

E. Reports to Committee

The group discussed a recent CO exposure Mass Casualty situation that occurred. 26 patients were transported by ambulance and many were self presenting to hospitals. Meriter had a total of 52 patients from the incident. The group also discussed CO monitors on EMS bags. The group agreed this is critical for safety of EMS providers on unknown CO cases. Meier will research their use around the county for possible action at the September meeting.
