Minutes - Final Unless Amended by Committee

Lakes & Watershed Commission

Consider:

Who benefits? Who is burdened?

Who does not have a voice at the table?

How can policymakers mitigate unintended consequences?

H. Reports to Committee

1. Committee Discussion on Asian Carp Migration

Dan Oele provided information on the fish community, aquatic life and dams in the Rock River and feels that the risk of Asian Carp migration is fairly low. Oele recommended the commission contact John Lyons as another resource.

Jopke informed the commission that he was part of an Asian Carp workgroup that was formed in 2010/2011 to look at the issue of Asian Carp migration and that the group determined that it was highly unlikely that we would see Asian Carp migration into system due to shallower water and the presence of piscivores which could help keep young carp numbers down. He encourage the commission to consider other waterbodies in the county that may need more attention on this issue, such as the Wisconsin River.

2. Work Group Budget Recommendations Discussion

The commission reviewed Hicklin's suggested budget timeline and made some additions. UPDIKE noted that the primary goal is to give joint endorsement of initiatives that departments develop and WEST added their importance in providing justification for issues that other committees can support.

Caryl Terrell (Capital Region Advocacy Network for Environmental Sustainability) emphasized the importance of the public input opportunity and the opportunity to share the budget recommendation with other committees.

Workgroups updates:

Chlorides - didn't meet

E&I – didn't meet

Public Health – didn't meet

HFHL – Staff are currently reviewing and providing input to updated recommendations. Next step will be to prioritize recommendations and collect public input, especially from farmers and others that would be impacted.

Stormwater TAC – State legislature inserted provision into larger development bill that includes limitations on the stay-on percentage and fees but staff are optimistic that there are still opportunities to strengthen stormwater management within the existing new legislation.

3. Community Engagement Report

Sandford encouraged commission members to attend the June 2nd Parks & Trails Unite Festival and share the opportunity with their communities.
