Minutes - Draft

Emergency Medical Services - Medical Advisory Subcommittee

Consider:

Who benefits? Who is burdened?

Who does not have a voice at the table?

How can policymakers mitigate unintended consequences?

C. Discussion Items

Magnesium Sulfate

Discussed possibility of stocking magnesium sulfate in a larger dose. Medically there is no difference in medication concentration, so it would be up to individual services to make operational decision. Vending machines will continue to stock lower dose, but can fit the larger dose if shortages necessitate it.

EMS Annual Survey - Final Feedback

2024 final results were sent out to group to get feedback on possible changes. Survey will be sent to agencies to be completed by end of June.

EMS Protocols - Standing Item

MEP - 2026 will have a more in-depth review. Accepting feedback from everyone until August 21st through a survey. Will use that to guide town halls that will be conducted in September. Goal is to submit to state by December, go-live by April. UW - continuing to work through adult and peds (70% complete). Suggestions were made to improve the feedback request form UW has out currently.

Question about using LUCAS device for traumatic cardiac arrest. UW does not recommend it unless it's for provider safety during transport. Dr. Spigner shares that NAEMSP new statement did not make any mention of mechanical CPR at all. Letter to editor said their regional trauma advisory council is putting together a statement about mechanical CPR. Anderson has asked if having data provided that shows quick application of LUCAS would help in making decisions. Will continue to discuss and have on June MAS meeting.

D. Presentations

E. Reports to Committee

DCEMS - EMS Association will have vendors for protective gear come in from 8-10am prior to meeting. UTV is available for summer events. Reserve through website. Falls Prevention class coming up for providers to learn how to evaluate a house for fall prevention needs.

Deer-Grove EMS - Took delivery of warming blankets that are battery powered and can be used for infant warming and everyday patients. Taking delivery soon of Glidescopes - proof that group purchasing can save money.
