

2026-2028 Legislative Agenda

General Principle

Dane County is the fastest-growing county in Wisconsin

Dane County is an economic powerhouse that embraces Wisconsin's traditions of tourism, supporting small businesses and economic development, and staying true to our state's values of supporting both our urban and rural neighbors.

As such, we believe that by working together the state can help bolster the success and prosperity of Dane County residents by supporting proactive, evidence-based policies and programs that foster economic success and work to eliminate racial and socioeconomic disparities. We appreciate intergovernmental partnerships and believe the state should recognize the unique role counties play in administering state programs by:

1. Fairly sharing responsibility with the counties in determining the scope, design, and cost of statewide programs;
2. Providing adequate and predictable shares of funding for state services delivered by the counties;
3. Helping counties reduce reliance on property taxes; and
4. Enhancing the ability of counties to more effectively manage county government.

In furthering these principles Dane County will assess policies via an analysis that asks:

- Who benefits?
- Who is burdened?
- Who does not have a voice at the table?
- How can policymakers mitigate unintended consequences?

Surface and Ground Water Quality

- **Water Quality:** Invest funding and staffing in water quality planning and watershed projects and increase funding for inland waterways and lakes. Maintain efforts to keep invasive species out of our bodies of water. Oppose efforts to erode the Public Trust Doctrine and the DNR's ability to regulate navigable waters and wetlands. Support a comprehensive approach to managing the levels of the lakes through collaboration with affected parties including dam operators, municipalities and regulatory agencies toward improving natural hydrologic conditions and habitat. Support efforts to manage the Yahara Chain of Lakes by improving the volume of water leaving the Yahara River system, reducing stormwater runoff volumes through increased stormwater infiltration, and improving management of stormwater on impervious surfaces.
- **Stormwater Utility and Water Management:** Allow for counties to create and manage stormwater utility, and support local control of erosion and stormwater management. Oppose efforts to standardize water management regulations or

prohibiting local governments from enforcing stronger standards. Support local governmental efforts to improve water management through water conservation, a balanced water budget, and enhanced groundwater recharge.

- **Mining Reform and High-Capacity Wells:** Support provisions restoring local government role for mining and suspend floodplain rules that would nullify flood insurance and federal disaster assistance. Support science-based regulation of high-capacity wells that considers the individual and cumulative effects of high-capacity irrigation wells on nearby water systems.
