2024 RES-010

**AUTHORIZING THE RECLASSIFICATION OF THE TERMINAL MAINTENANCE
SUPERVISOR AT THE DANE COUNTY REGIONAL AIRPORT**

Dane County Regional Airport has requested that the vacant position of Terminal Maintenance Supervisor, position number 3541, be reclassified from its current M8 range to range M10.

The position was approved as part of the adopted 2024 budget at wage range M8. The Airport requested a reclassification audit by the Employee Relations Division, as the position will supervise nineteen (19) skilled trades, maintenance and custodial employees, and will be assigned to the second shift. Employee Relations analyzed the job duties of this position in comparison with similar positions at the Airport and within other Dane County Departments and recommended reclassifying the position from M8 to M10.

Reclassifying Terminal Maintenance Supervisor from M8 to M10 will align with the supervisory responsibilities required for the second shift at the Airport and will fit within the current scope of Airport supervisory positions.

NOW, THEREFORE BE IT RESOLVED that the Dane County Board of Supervisors does hereby authorize the reclassification of Terminal Maintenance Supervisor (position number 3541) at the Dane County Regional Airport from wage range M8 to M10, commensurate with the Dane County Regional Airport's request and the Department of Administration – Employee Relations Division's recommendation and approval.
